Personal Memo from
JOSHUA LEDERBERG

Dr B Davis

Dear Bernie

NOV 7 1985

Thank you for yours of 11/1

I certainly joined in spirit the "honoring" of Sept 27.

I have dug up all the other references about auxanography + bioautography. Perhaps you told me verbally about some piece of that.

What firm about the amino-glycoside factors as ribosomes?

You may recall we ran into an early glimmer of that with Sm acting as a suppressor with Sm^D. Doubtless that's why you shared the anecdote.

Yours,

John.
