"on resistance"

JUL 29 1986

Humboldt or Helmholtz?

For 70 years or so I've been trying to track down the aphorisms attributed to Humboldt, i.e. by Morison and many others.

They are all copying one another.

I just now looked again at your article on resistance: I should have consulted you sooner.

Do you recognize the quote?

Could it have been Helmholtz?

Yours,  
JL.
