

Association of Army and Navy Surgeons.

Richmond, Oct. 17, 1863.

SIR:

The following is section B of the Third series of questions proposed:

THIRD SERIES OF QUESTIONS:

[B.]

- V. What NUMBER of cases have been followed by SECONDARY hæmorrhage after ligation of artery ABOVE the wound? Mention vessel, part of artery wounded, and the point ligated.
- VI. In arresting hæmorrhage, has LOCAL deligation, or ligation ABOVE the wound proved the safer method in YOUR hands? In how many cases have you resorted to the one or the other? Mention vessels injured.
- VII. Have hæmostatics proved of any avail in YOUR experience? How have they been used?
- VIII. How many cases of GANGRENE have followed ligation for PRIMARY hæmorrhage and how many for SECONDARY hæmorrhage?

SAM'L P. MOORE,

Pres't Ass'n A. & N. Surgeons.

Address: Surg. MIDDLETON MICHEL,
Act. Cor. Secretary,
Box No. 6, Richmond, Va.

Nov. 2. 1863
