In offering this Catalogue to the Medical Profession, we may state, that having paid especial attention to this part of our business, we have accumulated a stock that is more varied and extensive, as we believe, than any other in the country. In the collection will be found many *rare* and valuable works, a great variety of Anatomical Plates, plain and coloured, &c. &c. Also, a complete copy of the Medico-Chirurgical Review, 50 Vols. Many of the volumes of this long established *periodical* are entirely out of print, and a perfect copy can seldom be obtained. It is a library in itself, and ought to be in every Physician's collection.

REPUBLICATED

BY RICHARD AND GEORGE S. WOOD,

No. 261 PEARL STREET, NEW YORK.

Price, Five Dollars Per Annum, Payable in Advance.

A Work devoted exclusively to the interests of any one Profession, if it possesses merit, strongly recommends itself to every member of that profession; and as most of the improvements and discoveries in Medicine and Surgery are communicated through the medium of the Periodical Press, works of this kind are nearly as indispensable to the Physician or Surgeon as a hammer to the Artisan. Now, therefore, who are not indifferent to the interests of the profession, or who wish to keep pace with the progress of knowledge in their own department, can, without disadvantage, be without such a work. This Journal having been reprinted and extensively circulated in this country for more than twenty years, is too well known to make it necessary to enlarge much upon its merits. The acknowledged talents of the author, the ability, the impartiality, and the justness of its notices of new publications; which, forming in general, a complete abstract or synopsis of the work reviewed, supersede, in a measure, the necessity of purchasing the works themselves—the wide range taken in collecting its reports of cases, which are gleaned from the extensive hospitals of Great Britain, Ireland, and the continent of Europe; offering to the young practitioner the advantages of the most extensive practice—and its selections from American Journals, by which it combines in some degree the advantages of a foreign and domestic journal, give it a claim to patronage possessed perhaps by no other similar work. In confirmation of this opinion, the following testimonials, from gentlemen of the highest respectability in the profession are submitted.

RECOMMENDATIONS.

Sir,—I consider the Medico-Chirurgical Review among the most important additions to the Medical Literature of the day. I have no doubt it has contributed very much to the improvement of Medicine, both in Europe and in America. It certainly will not suffer by comparison with any similar work in either hemisphere; and I am happy to learn that you are engaged in continuing the publication of it in this country. Wishing you every success in this enterprise, I am, very respectfully, your obedient servant.

JOHN WATTS, Jr., Pres. of Coll. of Phys. and Surg., N. Y.

I consider the Medico-Chirurgical Journal as decidedly the most valuable periodical Medical publication we receive from Great Britain. The republication of it in this country, which I am happy to learn you intend to continue, cannot fail to advance the science of medicine.

ALEX. H. STEVENS, M. D. Prof. of Surg.

I entirely concur in the above opinions respecting the character of the Medico-Chirurgical Review, believing there is no Medical Journal superior to it in point of erudition and science on either side of the Atlantic.

JOSEPH M. SMITH, M. D. Prof. of Theo. and Prac. of Phys.

I have been in the habit of reading the Medico-Chirurgical Review from its first publication in this country, and have derived more advantage from its perusal, than any other Medical Journal with which I am acquainted.

EDW. DELAFIELD, M. D. Prof. of Obstet., &c.

The public opinion has been so decidedly and favourably expressed in relation to

merits of Dr. Johnson's Journal as to render almost unnecessary any additional testimony in favour of the spirit and ability with which it is conducted. Devoted as this Journal is to the analysis of works to which a great proportion of the Medical Profession in this country are necessarily denied access, I have always looked upon its republication here, as a substantial service rendered to the cause of Medical Literature in the United States; and I cannot therefore but wish the enterprising publisher every success in his endeavours to give it an extended circulation.

JOHN B. BECK, M. D. Prof. of Mat. Med.

The following Gentlemen have expressed their concurrence with the foregoing:

J. AUG. SMITH, M. D. Prof. of Anat. and Surg.; J. D. JAQUES, M. D., Treas. and Trustee of Coll. of Phys. and Surg.; JAS. FREEMAN DANA, Prof. of Chemistry; J. R. RHINELANDER, M. D., Dem. of Anat.; N. H. DERING, Regist.

I state with great readiness, the high opinion I entertain of Johnson's Medico-Chirurgical Review. Among foreign periodicals none can be more useful to the American practitioner both for enlightened views and extensive information.

T. ROMEYN BECK, (Albany.)

Sir,—I consider Dr. Johnson's "Medico-Chirurgical Review" one of the best periodical Journals of Great Britain, and believe that your republication of it will prove a valuable accession to the Medical Literature of this country. You have my best wishes for its success.

DAVID HOSACK, M. D., Pres. of Med. Fac. of Rutgers' Coll.

We fully concur in the opinion expressed by Dr. Hosack, of the value of Johnson's Journal. SAML. L. MITCHELL, M. D., Vice-Pres., WILLIAM J. MACNEVIN, M. D., Prof. of Ther. and Mat. Med.; VALENTINE MOTT, M. D., Prof. of Surg.; JOHN W. FRANCIS, M. D., Prof. of Obstet., &c.; JOHN D. GODMAN, M. D., Prof. of Anat. and Physiol.; JOHN GRISCOM, LL. D., Prof. of Chem.; P. S. TOWNSEND, M. D., Regist.

N. CHAPMAN, M. D., Prof. of Prac. Med. of University of Pennsylvania; W. E. HORNER, M. D., Prof. of Anat.; GEORGE B. WOOD, M. D., Prof. of Mat. Med.; WM. GIBSON, M. D., Prof. of Surg.; H. L. HODGE, M. D., Prof. of Obstets.; S. JACKSON, M. D., Prof. of Insts. of Med.

R. DUNGLISON, M. D., Prof. of Insts. of Med. &c., of Jefferson Med. Coll. of Phila.; R. M. HUSTON, M. D., Prof. of Mat. Med.; JOS. PANCOAST, M. D., Prof. of Surg. Anat.; J. K. MITCHELL, M. D., Prof. of Prac. of Med.; THOMAS J. MUTTER, M. D., Prof. of Prac. and Surg.; CHAS. D. MEIGS, M. D., Prof. of Obstets.

S. G. MORTON, M. D., Prof. of Anat. and Phys., of Pennsylvania College; GEORGE McCLELLAN, M. D., Prof. of Surg.; WM. RUSH, M. D., Prof. of Prac. Med.; R. M. EIRD, M. D., Prof. of Mat. Med.; SAMUEL McCLELLAN, M. D., Prof. of Obstets.

Sir,—I am much gratified to learn, that you propose to continue the republication of Johnson's Medico-Chirurgical Review. This work I have taken from its commencement in 1830, and from a comparison of it with other periodical publications, I have no hesitation in expressing my belief, that it is the best Medical Journal now published in Europe. It is not like many works of the kind, a mere temporary journal, a repository only of the most recent intelligence, but it conveys to the Profession an inestimable treasure, a full analytical view of Medical Literature, serving as a book of study for the present time, and a most valuable record for future reference. It cannot be too strongly recommended, and particularly to those who, from extensive professional avocations, or removal from good libraries, have no means of consulting the original works which daily issue from the press.

Truly and respectfully yours, THOMAS SEWELL, (Washington, D. C.)

My Dear Sir,—In compliance with your request of my opinion of the Medico-Chirurgical Review, I make no hesitation in saying, that in the style and arrangement of its matter, the number and variety of subjects discussed; the impartiality and strictness of its critiques, it is superior to any other British journal with which I am acquainted, and not inferior to any journal, European or American. The impartiality it has evinced towards American authors is an additional claim to the regard of the American Physician. I do therefore hope, most sincerely, that the Medico-Chirurgical Review will meet with a most liberal patronage, and that it will occupy a place in the library of every physician.

Very respectfully yours, W. WILLOUGHBY, (Newport, N. Y.)

The London Medico-Chirurgical Review, conducted by Dr. Johnson and others, is one of the best periodical works on Medical Science. Its republication in this country must be considered very useful to the medical profession.

JOHN C. WARREN, (Prof. of Anat. and Surg., Boston.)

Sir,—I have been a reader of the Medico-Chirurgical Review from its first publication, and have found it at all times to contain a general view of the current medical literature of the day. This makes its pages very valuable, and enables the medical practitioner to judge what works he need to possess himself of. I hope that its republication in this country will be sufficiently encouraged. I am, Sir, your obedient servant,

JAMES JACKSON, (Boston.)
