THE RYNEAR CROWN.

(Patented Sept. 16th, 1884.)

1st Lower Bis. Upper Bis. Lower Molar. Up. Molar.

☞ SIMPLE — EFFECTIVE — BEAUTIFUL.

We are prepared to furnish the Dental Profession with a metallic Crown for molar and bicuspid teeth made from one unbroken piece of pure gold. The cusps or grinding surfaces are exact counterparts of the human teeth, while the surrounding portion or sides conform to their necks. Different sizes of each crown are made, enabling the selection of one which will so nearly fit the affected tooth as to require but a slight compression of its sides to perfect it.

The following advantages are claimed for these Seamless Crowns:

FIRST.—They are formed from an unbroken piece of pure gold, *no solder being used*, thus enabling a perfect adaptation of all its parts.

SECOND.—They relieve the Dentist of the necessity of constructing them, thereby saving time and trouble to both the operator and the patient.

THIRD.—The operation is more perfect in every detail and presents a better appearance when completed.

FOURTH.—It places in the reach of all a superior class of Dental work, which heretofore has been confined to a limited few.

◆◆◆

That the Rynear Crown is SIMPLE, EFFECTIVE and BEAUTIFUL, it is only necessary to give it one trial to convince the most sceptical.

◆◆◆

DIAGRAM OF MEASUREMENT, DIRECTIONS FOR USING THE RYNEAR CROWN, PRICE LIST AND CIRCULAR, WITH REFERENCES FROM LEADING DENTISTS WILL BE SENT FREE,

◆◆◆

All Communications will Receive Prompt Attention

NICHOL'S CARBOLIC DENTIFRICE.

DURING the last three years we have sent samples of our Dentifrice to some of the leading members of the dental profession in every State in the Union, inviting criticism and soliciting any suggestion which in their opinion would tend in the least to improve it. To which a generous response has been received. Opinions and suggestions have been given with that freedom, frankness, liberality and candor, which particularly characterize the profession. Pharmacists and physicians have likewise been consulted. Through these sources we have obtained the information which has enabled us during the last year to so revise our formulas as to give to the profession, and through them to the public, a strictly pure, safe, efficacious and in every particular reliable Dentifrice, incapable of injury to the teeth or tissues of the mouth.

Of this Dentifrice we now prepare two kinds, both Carbolicized by Spray of Pure Re-Distilled Phenol. No. 1 is saponaceous, No. 2 is not; otherwise they are alike. Those who prefer a saponaceous powder will find in No. 1 an elegant preparation. No. 2, like No. 1, is a great Disinfectant and Deodorizer. It is also very agreeable to the taste. Both of these powders impart to the mouth and breath a prolonged sense of coolness and cleanliness experienced by the use of no other Dentifrice. Put up in beautiful enamelled cans, also in bottles.

In one pound cans.....	per lb.	\$1.00
In half pound cans.....	"	1.04
In quarter pound cans.....	"	1.08

Special rates for ten to twenty pound cans.
In bottles, exact size and style of cut, sprinkle tops,
nickel plated, per gross, \$24.00; per doz. \$2.00
With fancy corks..... 19.80; 1.65

Labels with blank address will be sent with each dozen. Plainly written addresses accompanying order for ONE-HALF GROSS will be neatly printed on label.

One writes: "Send half gross of No. 1, with sprinkle tops. My patients are delighted with it. Its sale increases, and my business in proportion. I can ask for no better advertisement. You have my address."

WILLIAMS' INSOLUBLE CROWN CEMENT, An Oxy-Phosphate for Filling Teeth.

For uniformity, strength, durability, density quality, quantity and price, it has no equal.

Large sized packages, each containing one ounce of powder in two colors, and one-half ounce of liquid; also two small vials filled with yellow and gray pigments so that any desired shade may be obtained. Price, \$2.50 Small sized packages, one color, Price, \$1.50

Over 8000 pkgs. sold during 1885 and hundreds of testimonials received from leading dentists. For sale at nearly all Dental Depots in U.S. Liberal discount to the trade

Manufactured exclusively by DR. G. W. WILLIAMS, Germantown, Phila., Pa.

HARDMAN'S WHITE ALLOY

Takes the place of gold for filling front, or any teeth.

PRICE, \$3.00 PER OZ.

Test for Color.—Place a button of Amalgam, that has one surface polished, into a solution of 40 to 60 grs. of sulphuret of Potassa in 1 oz. of water. Let it remain 24 to 48 hours.

Test for Leakage.—Fill a small glass test tube with it, just as you would a cavity in a tooth, and drop it into a bottle containing an alcoholic solution of red aniline.

This Alloy Stands These, and Any Other Tests Deemed Requisite to Perfection.

Manufactured by J. HARDMAN, Muscatine, Iowa.

A LIBERAL DISCOUNT IN QUANTITIES.

LAWRENCE'S AMALGAM

"THE OLD RELIABLE."

This Amalgam has received the endorsement of the Profession at large for over forty years, which would seem to render any remarks as to its excellence superfluous.

Never accept Lawrence's Amalgam in any other form than in my Lithograph Envelope with trade mark on the lap, nor if offered at less than my advertised rates.

Price, \$3.00 per ounce. Purchase only of reliable dealers, their agents or of the inventor and only manufacturer,
