## NOTE.

*We ask the especial attention of our customers to the Advertisements in the last pages of this book. They are from Houses of established repute, and the goods represented can be relied on to be as represented.*

*We also request that the book be kept where it can be readily referred to, for we are confident that both the Catalogue and the Hand Book will be often found of value for reference.*

VERMONT.

A CATALOGUE

OF

DRUGS, CHEMICALS,

DYE STUFFS,

Druggists' Sundries,

PROPRIETARY MEDICINES,

OILS, PAINTS, COLORS,

VARNISHES, BRUSHES,

AND GLASS WARE,

FOR SALE BY

Wells, Richardson & Co.,

BURLINGTON, VERMONT.

## TO THE TRADE.

WE take pleasure in presenting this new and greatly enlarged edition of our Catalogue. We trust our customers will find it an aid in the transaction of their business, and that it will prove satisfactory to those who have asked for a full catalogue of the DRUGS, CHEMICALS, DYE-STUFFS, PROPRIETARY MEDICINES, and DRUGGISTS' SUNDRIES kept by us. We have made it simply a catalogue instead of a price list for the same reason given in our last edition, i. e. : the impossibility of giving prices that will prove reliable for any length of time. Particularly at this time, on account of the war in Europe, imported goods are varying in value every day, and a price list will often prove more likely to lead astray than to guide. We shall always be pleased to give parties quotations by mail, when requested.

We shall endeavor to make it the interest of all our friends to continue their trade with us, guaranteeing at all times pure and genuine goods at as low prices as goods of equal quality can be purchased elsewhere. We shall keep constantly on hand a full list of the standard Patent Medicines, and add new ones as rapidly as the public demands. Our stock of drugs is very full, embracing almost every article known to the trade, as will be seen by reference to the list.

We now keep a complete line of Paints and Oils, and should be pleased to fill orders, or give quotations for them.

Since establishing the Drug branch of our business it has steadily increased, till it now forms the largest share of our trade. We ascribe this to our determination from the outset to keep nothing but prime goods, and to sell them at low figures, and the same determination shall guide us in the future. For the special convenience of our numerous customers who do not keep a full stock of drugs, we have prepared a list of Grocers' Drugs, to which we call their attention.

We shall give special attention to this part of our trade, and dealers can rely on getting the lowest market rates. All orders by mail will receive our prompt attention. In ordering please give full shipping directions. Our agents will, as heretofore, make their usual calls on our customers, and we bespeak for them your favors.

Yours truly,

WELLS, RICHARDSON & CO.

BURLINGTON, VT., JUNE 1st, 1878.

# Manufacturing Department.

We beg to call the attention of our friends and customers to our Fluid Extracts, Elixirs, Syrups, &c.

The manufacture of all our preparations is personally conducted by a member of the firm, and they can be relied upon in every particular.

Our Elixirs and Fluid Extracts have already been largely used, and have given unqualified satisfaction. Our Fluid Extracts are made without heat, by a process which thoroughly exhausts the Drug. Each fluid ounce accurately represents one troy ounce of the crude material. For a full description of the process we would refer to a paper by Mr. Van Patten, in the report of the Vermont Pharmaceutical Association for 1875. We solicit a comparison of their quality with those of other manufacturers, confident that they are unexcelled, and that they are much superior to many that are in the market.

We will thank our patrons to call the attention of their physicians to our preparations, knowing that they will appreciate their elegant appearance and excellent quality. We will be happy to furnish samples to be given to physicians whenever desired.

We guarantee our preparations to contain exactly the quantities represented, and to be of standard quality in every respect.

A reduction of 10 cents per lb. will be made on any article when ordered in 5 lb. bottles.

In addition to the above articles of our own manufacture, we keep a line of HENRY THAYER & Co.'s Fluid and Solid Extracts, and S. C. Pills; also the same line of the manufacture of TILDEN & Co. Also Elixirs, Syrups, and Pills made by JNO. WYETH & BRO., Philadelphia, and special articles of several other manufacturers. Complete lists of any of the above makers sent on application.

# Miscellaneous Preparations.

Under the appropriate headings, in the first and second part of this Catalogue, will be found the lists of Essences, Flavoring Extracts, Oils, Ointments, Plasters, Powders, Spirits, Syrups, Tinctures, Wines, etc., which we manufacture. In addition to the lists given we can furnish to order any other officinal or common preparations. All articles are made with strict fidelity to the standard authorities, and can be relied on.

## SPECIALTIES.

We solicit orders for the following articles, of which we are either proprietors or special agents :

Leamon's Dye Colors, large,..... doz.  
small,.... .. "

## PAINTS.

### WHITE LEAD IN OIL.

We are pleased to inform our customers that we have taken the agency for Vermont, Northern New York, and New Hampshire, for Hall & Bradley's Pure White Lead.

After diligent inquiry amongst those having great experience in Leads we became convinced that this brand was the best White Lead in the market. We fully warrant it in every particular. If it fails to give satisfaction after fair trial, it may be returned at our expense.

We also keep a line of lower priced Leads which we can recommend.

The "Burlington" we have made for us specially, and particularly recommend it to those wanting a good lead at a little less price than the H. & B.

## VARNISHES.

Coach Extra, Light Shade . . . . .gall.

Is used for light colors on carriages and sleighs, and for all work requiring light varnish.

Extra No. 1 Coach . . . . .gall.

For common or ordinary coach work, or for revarnishing old work, agricultural implements, &c.

No. 1 Coach. . . . .gall.

For the same purposes as above.

Wearing Body . . . . .gall.

For finishing or last coat on railroad cars, coach bodies, and all work exposed to the weather. Works free under the brush, flows down smoothly, has a brilliant gloss, and is very durable.

Rubbing Carriage . . . . .gall.

For first coat, or filling up, for fitting and preparing ground work for finishing coat.

Elastic Gear . . . . .gall.

For last or finishing coats, on running or gearing parts: is sometimes used as a Medium Body Varnish; its working and durable qualities are like the Wearing Body.

Elastic Coach . . . . .gall.

For finishing coats; an excellent varnish.

No. 1 Furniture, Quick Drying . . . . .gall.

Used for all kinds of furniture, chairs, graining, and all inside work that does not need polishing: dries quickly; has a fine gloss.

No. 2 Furniture. . . . .gall.

Same purpose as above.

Rubbing Furniture . . . . .“

White Copal . . . . .“

For light graining, picture frames, church pews, &c.

White Damar.....	gall.
For paper, maps, mixing paints, &c.	
Black Asphaltum.....	"
Is used for smoke pipes, iron railings, castings, hardware, saddlery, and iron work generally.	
Coach Makers' Drying Japan..	gall
For coach work.	
Brown Japan.....	"
A quick drier for varnishers and painters.	
Light Shellac.....	gall.
For russet leather, furniture finishing, killing knots, filling grain of wood, &c.	
White Shellac.....	gall.
For white woods, &c.	
Walnut Stain .....	gall.

Also Stimson & Co.'s celebrated Varnishes.  
See their advertisement.

# WELLS, RICHARDSON & Co.'s HAND BOOK

—OF—

## Useful Information, Receipts,

TABLES, ETC., ETC.

For Druggists and Merchants.

---

In preparing the following pages we have endeavored to present in compact form as large a quantity as possible of items of interest to the trade. We have intended to give such as are not found in ordinary books of reference, and trust they will be of value to our customers.

---

### SYNONYMOUS NAMES OF COMMON DRUGS, Etc.

---

Acid, Carbolic, Phenic Acid, Phenol, etc.

Acid, Citric, Acid of Lemons.

Acid, Hydrochloric, Muriatic Acid, Acid of Salt, Spirit of Salt.

Acid, Nitric, Aqua Fortis.

Acid, Nitro-Hydrochloric, Nitro-Muriatic Acid, Aqua Regia.

Acid, Oxalic, Acid of Sugar.

Acid, Sulphuric, Oil of Vitriol, Spirit of Vitriol.

Acid, Sulphuric, Aromatic, Elixir of Vitriol.

Alcohol, Rectified Spirit, Spirit of Wine.

Annatto, Annotta, Orleana, Otter.

Ammonia Aqua, Spirits of Hartshorn, Volatile Spirit, Liquor

Ammonia, Solution of Ammonia, Water of Ammonia.

Ammonia, Carbonate, Sesquicarbonate of Ammonia, Hartshorn,  
Sal Volatile.

Ammonia, Muriate, Chloride of Ammonium, Hydrochlorate of  
Ammonia, Sal Ammoniac.

Anodyne, Hoffman's, Hoffman's Drops, Compound Spirit of Ether.

- Antimony, Sulphuret of, Black Antimony, Crude Antimony.  
Antimony, Oxysulphuret of, Kermes Mineral.  
Antimony and Potassa, Tartrate of, Tartar Emetic.  
Antimonial Powder, James' Powder, Oxide of Antimony.  
Animal Charcoal, Ivory Black, Bone Black.  
Arsenic, White, Oxide of, the Arsenic of Commerce, Arsenious Acid, Ratsbane.  
Arsenic and Potassa, Solution of, Fowler's Solution.  
Arsenic and Mercury, Solution of Iodide of, Donovan's Solution.  
Arseniate of Soda Solution, Pearson's Arsenical Solution.  
Balsam of Fir, Canada Balsam.  
Bark, a general name for the species of Cinchona Bark, as Red Bark, Yellow Bark, Pale Bark, etc.  
Bark, Curacoa, Bitter Orange Peel.  
Bark, Black Oak, Quercitron Bark.  
Benzoic Acid, Flowers of Benzoin.  
Bi, Bin, and Deuto, used for double : as Bi-carbonate, Bin-oxalate, Deuto-iodide.  
Bi-chloride of Mercury, Corrosive Sublimate.  
Calamus, Sweet Flag.  
Chloride of Mercury, Calomel, Sub Chloride, or Mild Chloride of Mercury.  
Chalk, French, Soapstone.  
Cocculus Indicus, Fish Berries.  
Colocynth, Bitter Apple, Bitter Cucumber.  
Creasote, Oil of Smoke.  
Compound Tincture of Cinchona, Huxham's Tincture of Bark.  
Compound Tincture of Benzoin, Jesuit's Balsam.  
Copper, Sulphate of, Blue Vitriol, Blue Stone, Roman Vitriol.  
Ergot, Spurred Rye, Smut Rye.  
Flowers of, the product of Sublimation ; such as  
Flowers of Benzoin, Benzoic Acid.  
Flowers of Sulphur, Sublimed Sulphur.  
Flowers of Zinc, Oxide of Zinc.  
Graphite, Plumbago, Black Lead.  
Gypsum, Plaster Paris, Calcined Plaster, Dentist's Plaster.  
High Wines, Proof Spirit, 50 per cent. Alcohol.  
Hydriodate, used for Iodide.  
Hydro-Chlorates, Chlorides, Muriates.

- Hydrocyanic Acid, Prussic Acid.  
Indigo, Sulphate of, Chemic, Chemic Blue, Solution of Indigo, Compound Blue.  
Iron and Ammonium, Sulphate of, Iron Alum, Flores Martiales.  
Iron, Oxide of, Crocus Martis, Jeweler's Rouge, Colcothar.  
Iron, Chloride of, Solution, Solution Perchloride of Iron, Solution Sesquichloride of Iron, Solution Muriate of Iron.  
Iron, Persulphate of, Monsel's Salt.  
Iron, Persulphate of, Solution, Monsel's Solution.  
Iron, Sulphate of, Copperas, Green Vitriol, Vitriol of Mars, Sal Martes.  
Iron by Hydrogen, Reduced Iron, Quevenne's Iron.  
Iron with Sugar, Pil. Carb. Iron, Vallett's Mass.  
Isinglass, Gelatine, Cooper's Gelatine, (for Cooking.)  
Isinglass, American, Fish Glue, Fish Sounds. (for Cements, &c.)  
Kalium, Potash, Kali Purum, Pure Potash.  
Labarraque's Liquor, Solution Chloride of Soda.  
Lac Sulphur, Precipitated Sulphur.  
Lead, Acetate of, Sugar of Lead, Sal Saturni.  
Lead, Liquor, Sub Acetate of, Goulard's Extract.  
Lead, Semivitrified Oxide of, Lithrage.  
Liquors, Solutions.  
Lunar Caustic, Nitrate of Silver, in sticks.  
Magnesia, Solution, Citrate of, Purging Lemonade.  
Magnesia, Sulphate of, Epsom Salts, Bitter Salt, Sal Amarum, Physical Salt.  
Mercury, Quicksilver.  
Mercury, Ammoniated, White Precipitate.  
Mercury, Red Oxide of, Red Precipitate.  
Mercury, Black Sulphuret of, Black Precipitate, Ethiop's Mineral.  
Mercury, Red Sulphuret of, Cinnabar.  
Mercury, Yellow Sulphate of, Turpeth Mineral, Queen's Yellow.  
Mercurial Ointment, Unguentum, Blue Ointment.  
Mercury, with Chalk, Gray Powder, Blue Chalk, Mercurial Chalk.  
Mercury Pill Mass, Blue Mass, Blue Pill.  
Muriate of Tin. Solution, Madder Compound, Cochineal Compound, Tin Mordant.  
Natron, Soda.  
Nux Vomica, Dog Button.

- Ointment, Nitrate of Mercury, Citrine Ointment, Yellow Ointment.  
Opium, Thebaicum.  
Opodeldoc, Soap Liniment.  
Olibanum, Incense, Frankincense,  
Potassium, Potassa, Potash, Pearlash.  
Potassium. Binocalate of, Sal Acetoselle, Salts of Lemon, Salts  
of Sorrel.  
Potassium, Bitartrate of, Cream Tartar.  
Potassium, Carbonate of, Sal Tartar, Salt of Wormwood.  
Potassium, Nitrate of, Saltpetre, Sal Niter.  
Potassium, Nitrate of, Fused, Sal Prunella.  
Potassium, Sulphuret of, Liver of Sulphur.  
Potassium, Tartrate of, Soluble Tartar.  
Poke Root, Garget Root, Coakum, Pigeon Berry.  
Powder of Aloes and Canella, Hiera Picra.  
Powder of Ipecac and Opium, Dover's Powder.  
Proto, Single, Sub.  
Snakeroot, Canada, Wild Ginger, Indian Ginger.  
Soda, Bi Carbonate of, Super Carbonate of Soda, Baking Soda,  
Saleratus.  
Soda, Carbonate of, Sal Soda, Washing Soda.  
Soda, Sulphate of, Glauber's Salts, Horse Salts.  
Soda, Tartrate of, and Potassa, Rochelle Salts.  
Syrup Squills Compound, Hive Syrup.  
Syrup of Phosphates Compound, Chemical Food.  
Tincture Aloes and Myrrh, Elixir Pro.  
Tincture Opium, Tincture Thebiaca, Laudanum.  
Tincture Opium. Acetated, Black Drop.  
Tincture Opium, Camphorated, Tincture Camphor Compound,  
Paregoric, Elixir Paregoric.  
Treacle, Theriaca, Molasses.  
Valerian, American, Ladies Slipper, Nervine Root.  
Wine of Antimony, Antimonial Wine, Wine of Tartar Emetic.  
Yellow Root, Hydrastis, Golden Seal, Yellow Puccoon.  
Zinc, Sulphate of, White Vitriol.

## POISONS AND THEIR ANTIDOTES.

*In all cases, evacuate the stomach by an emetic at once: if vomiting cannot be induced, stomach-pump must be used; is particularly useful when narcotics in liquid have been taken; it requires care at all times, and is liable to lacerate where corrosives have been taken. To produce vomiting, warm water or warm mucilaginous drinks should be given copiously to keep it up, and to thoroughly evacuate the stomach the best emetics are: Ground mustard, large teaspoonful in a tumbler of warm water. Powdered alum, half ounce doses. Sulphate zinc, 10 to 30 grains. Tartar emetic, 1 to 2 grains. Powdered ipecac, 20 grains. Sulphate copper, 2 to 5 grains. When prostration exists stimulants should be resorted to.*

*Acids.*—The alkalies. Common soap in solution is efficient. Follow by copious draughts of tepid water or flaxseed tea. For nitric or oxalic acid, give carbonate magnesia and chalk.

*Animal Poisons. Poisonous Fish, Stale Fish, Mussels, etc.*—Emetics; large draughts of warm water. After full vomiting, active purgatives. Give vinegar and water, and sponge the body with the same. The after treatment must be according to the symptoms.

*Arsenic and its Compounds.*—Sweet oil, butter, or any oil or fat, and magnesia in large quantity. Hydrated oxide iron, *fresh*, table-spoon doses every 5 or 10 minutes; oil and lime water mixed. Dialysed iron is very effectual.

*Bites and Stings, Scorpions, Tarantulas, Spiders, Bees, &c.*—Rub the part with tinct. iodine. If alarming, give calming drinks and diaphoretics. An application of water of ammonia or of a solution of soda will greatly relieve the pain and irritation of stings and bites.

*Rabid Dogs.*—Apply a tight ligature above the bite. Remove the bitten part with the knife, letting it bleed after being well washed with warm water. Cauterize with red or white hot iron or lunar caustic, then cover with lint dipped in volatile liniment (hartshorn and olive oil). Remove the ligature if much inflammation ensues. Induce perspiration, keep the patient warm in bed, and give a little wine occasionally. The after treatment

must be governed by the symptoms. There is no known specific treatment for Hydrophobia.

*Copper and its Compounds.*—Albumen, milk or white of egg in solution given freely. Ferrocyanuret of potassium freely. *Vinegar must be avoided.*

*Creasote*—Albumen, or white of eggs milk, or wheat flour.

*Cyanide of Potassium and Prussic Acid.*—Chlorine water, solution chlorinated soda, aqua ammonia, ice water poured from a height on the head in cases of prussic acid; solution carb. potass., followed quickly by aqueous solution sulphate iron. This is so instantaneous that there are but few chances of success.

*Gases.*—In cases of Asphyxia, copious cold affusions, especially to the head, blood-letting, artificial respiration. Stimulants carefully administered.

*Lead, Salts of.*—If an insoluble salt, oil sweet almonds or olive, Albumen, Epsom salts, Glauber salts, dilute sulphuric acid, lemonade, opium, followed by emetics.

*Salts of Mercury.*—Albumen, or white of eggs, milk, flour mixed with water, followed by emetics. In cases of corrosive sublimate, hydrated proto-sulphuret of iron destroys its poisonous properties. To check excessive salivation, give small doses chlorate of potash.

*False Mushrooms*—Emetics, and afterwards cathartics, mucilaginous drinks warm. If convulsions continue, apply mustard to feet.

*Digitalis, Conium, Colchicum, Lobelia, Belladonna, Stramonium, Tobacco, Nux Vomica and other Vegetable Poisons.*—Emetics, or stomach-pump, followed by administration of purgatives. In cases of tetanus, the use of chloroform will produce relaxation. Free use of decoctions or infusions containing tannic acid may be resorted to with advantage.

*Opium and its Compounds*—Emetics, strong decoctions, tea, coffee and other vegetable astringents are useful; cold affusions on head, chest and spine. Stomach-pump must be used until the water has no longer the smell or taste of opium. Flagellation to arouse the patient and keep him moving, and dash cold water on head and shoulders. Lastly electro-magnetic battery, artificial respiration, active stimulation is often required. Bleeding and administration of vinegar are objectionable.

*Strychnia*.—Emetics freely, Kermes mineral, tannic acid, tinct. iodine, chlorine water, ether or chloroform by inhalation.

*Salts of Silver*.—Give common salt freely in solution.

*Snake Bites*.—Sub-cutaneous injections of ammonia. Give alcohol or spirits until drunk.

## DROWNING, SUFFOCATION, &c.

*Treatment of the Apparently Drowned*.—Water extinguishes life as it does fire, simply by *keeping off the air*; therefore, restoring air to the lungs by inflation, is most to be depended on, and should be commenced the moment the body is out of the water, and continued perseveringly as long as it *retains any warmth, and while the limbs are flexible*. Let the water drain from the mouth, remove mucus, then press back the larynx, close both nostrils, and blow forcibly your own breath into the lungs, through the corner of a handkerchief, which you have laid over the mouth. As soon as you can procure bellows, close the mouth and one nostril, and blow through the other, still pressing back the windpipe.

Having distended the lungs fully, press on the chest so as to empty the lungs: do this alternately, imitating natural respiration. Remove the neckcloth, *cut off* the wet clothes, rub the body dry, apply *dry* heat in every possible way, as soon as you can get the body into a house, carrying it on a hurdle or plank, with the head raised. If the glottis be spasmodically closed, you must use the tracheal tube to inflate with; and if oxygen gas could be obtained it would be more efficient. Stimulants may be got into the stomach by means of the flexible tube, till the person can swallow; and clysters of mustard with salt or brandy and water may be thrown up. Bleeding *cautiously* may relieve the congestion on the right side of the heart. Electricity may be tried, passing *gentle* shocks through the heart, the body being insulated by placing it on a shutter, supported by quart bottles perfectly *dry* on the outside. Tracheotomy may be performed if other means fail in distending the lungs.

## TREATMENT OF PERSONS SUFFOCATED

*By Carbonic Acid Gas ; Hydrogen or Nitrogen Gas ; Coal Gas ; Exhalations from Depositories of Soil, etc.*—If the body retains its heat, expose it to the air, and dash cold water over the head, neck, and breast. The lungs should be inflated, the nostrils stimulated, and if the veins of the neck appear full, some blood may be removed from them. If the temperature of the body be below the natural standard, heat must be applied instead of cold. Friction may be useful.

*Treatment of Persons Struck by Lightning.*—Inflate the lungs as early as possible; apply stimulants, more particularly gentle electrical shocks, passed through the chest, and along the spine; keep up the temperature by external heat, and get warm cordials into the stomach by means of the flexible tube and syringe.

*Treatment of Persons Hanged.*—Remove the ligature as soon as possible, and act as for a drowned person, with the exception of opening the jugular vein, and removing, if possible, six or eight ounces of blood. Death is caused rather by suffocation than by apoplexy, therefore, the lungs should be supplied with air without delay.

*Treatment of Persons who have been exposed to Intense Cold*—First use gentle friction with snow or iced water; or, if these are not to be had the cold bath may be used; and whilst the person remains in it, small quantities of hot water must be added at intervals, so as to raise the heat very gradually. The lungs to be inflated. Warm wine, or any other warm fluid to be given, very cautiously at first, and solid food should be withheld for some hours after recovery.

## DISINFECTANTS.

*Carbolic Acid* in solution; used by exposing to the atmosphere in open vessels; is one of the best disinfectants known.

*Charcoal, or Dry Earth.*

*Chloride of Lime.* An old and favorite disinfectant. It should be sprinkled about, or may be dissolved in water (2 lbs. to a pailful), and used as needed.

*Heat:* dry or in form of steam, temperature of 250° or more, is the best method of disinfecting linen, or clothing.

*Liq: Sodæ Chlorinat* : (Labarraque's Solution) employed in the vessels intended to receive the excretions.

*Permanganate of Potass* : an excellent disinfectant, possessing the advantage of having no odor of its own ; in solution, strength of from one to ten grains to the ounce of water, is a useful disinfectant application to suppurating sores. Useful for depriving night chairs of offensive odor.

*Quicklime*, as an absorbent of deleterious gases, exposed to the action of the atmosphere in a sick chamber.

*Copperas*, in solution, one pound to a gallon of water, a cheap and effective disinfectant for water-closets, cess-pools and impure localities ; its efficiency is much increased by combining it with lime. A strong solution of Copperas with Carbolic Acid is one of the best disinfectants against Cholera.

*Zinci Chloridum* ; in solution, strength two drachms to one pint water ; used by suspending cloths saturated with the solution, and poured in the vessels intended to receive the excretions.

In a paper on Disinfectants, read before the Vermont Pharmaceutical Association, by W. J. Van Patten, the following was the conclusion : "As the result of this investigation the following conclusions are arrived at : the best disinfectants for various purposes are as follows :

1st. For unoccupied buildings, the fumes of burning sulphur or chlorine gas.

2d. For occupied buildings, chloride of lime or carbolic acid, and ventilation.

3d. For the sick room, solution of the chloride of aluminum (Bromo Chloralum) and ventilation.

4th. For privy vaults and cess-pools, chloride of lime, copperas, and charcoal or dry earth.

5th. To prevent putrefaction, carbolic acid.

6th. For preserving dead bodies, Bromo Chloralum.

7th. For disinfecting clothing, dry heat.

8th. To prevent the spread of contagious diseases, chloride of lime."

Privies can be kept odorless and harmless by throwing into them once a week one or two shovelful of wood or coal ashes, or of perfectly dry earth. There is no excuse for the foul odors which usually proceed from these out-houses.

## DIRECTIONS FOR PAINTING.

Owing to the great variety of places and purposes for which paint is used, and the still greater variety of colors, shades, and tints which are made, it is difficult to lay down specific rules for the mixing and applying of paint. It is much easier for a good painter to *show* than to *tell* how to work in paint. We will therefore attempt to give only a few general hints.

1st. To determine the amount needed one must estimate the number of yards to be painted. In case of painting the outside of a house this is very simple. Add the length to the breadth, multiply the sum by two and that product by the height to the eaves; then divide this product by nine, and we have the number of superficial yards on the building.

For first coat, (priming) one hundred pounds of pure lead will require from seven to eight gallons of oil.

For the other coats it will take about half as much.

As a rule, of paint, mixed in these proportions, there will be required one pound for every yard of two-coat work, and one and a third pounds for every yard of three coat work.

For outside work, use as much raw oil as the weather will permit; in drying weather use all raw oil for first coat, two-thirds for the second, and one-half for the third.

For inside work use as little boiled oil as possible, using mostly turpentine. The paint will keep white longer.

Paint, to last long, should be put on early in winter or spring, when it is cold and no dust flying. Paint put on in cold weather forms a body or coat upon the surface of the wood that becomes hard and resists weather, or an edge tool even, like slate.

Oil paint dries with a gloss, turpentine makes a dead surface; and, in using paints containing both oil and turpentine, the gloss will be less as the proportion of oil is diminished. Paint requires more dryer in cold than in hot weather, but is more durable in outside work if applied in cold weather. Successive coats of paint should have at least a day intervene between them for drying. Dark colors should have a glossy finish. Before commencing to paint, the surface must be perfectly dry. The paint must be thoroughly mixed, both before commencing and during the pro-

gress of the work : if this is neglected, the heavy ingredients are apt to settle, leaving a larger proportion of oil and turpentine on the surface.

### COMPOUND COLORS.

It would be an endless task to enumerate all the colors formed by the mixture of other colors. We will therefore give the simplest methods of making various tints, leaving the reader to exercise his own judgment as regards others not mentioned. If you would produce

STRAW COLOR,	add Chrome Yellow to White Lead.
SILVER GRAY,	" Lampblack and Blue to White.
ROSE COLOR, } PINK, }	" Carmine or Lake to White.
PEA GREEN,	" Chrome Green to White.
LEAD COLOR,	" Lampblack to White.
WOOD COLOR,	" Raw Umber to White.
BRILLIANT GREEN,	" Emerald Green to White.
BRIGHT GREEN,	" Paris Green to White.
DRAB COLOR,	" Umber to White.
BUFF COLOR,	" Yellow Ochre to White.
SALMON COLOR,	" Red, Umber and Yellow to White.
FLESH COLOR,	" Carmine to Straw Color.
DARK GREEN,	" Black to Chrome Green.
BROWN,	" Red and Black to suit.
PURPLE,	" Red to Light Blue.
PEARL COLOR,	" Blue to Lead Color.
ORANGE,	" Vermilion to Chrome Yellow.
OLIVE,	" Chrome Yellow, Blue, Black and Red.
CHESTNUT,	" White to Brown.
CHOCOLATE,	" Yellow to Brown.
CREAM WHITE,	White, tinted with Red and Yellow.
FRENCH WHITE,	White, tinted with Purple color.
PEARL WHITE,	White, tinted with Blue and Purple.
ASHES OF ROSES,	White, tinted with Lead color and Lake.
FRENCH GRAY,	White, tinted with Black and Purple.

## HOW TO GAUGE.

Push the Gauge Rod into the barrel, as shown in the above cut, with the side uppermost which is stamped "Wine Gallon." The figures and marks on the rod show how many gallons the package will hold. Measure from the middle of the bung-hole, and the

underside of the stave, thus A is the point to measure from. Measure both ways (as the bung-hole may not be in the center of the barrel), for instance, if it measures 44 gallons from the bung-hole to lower chine one way, and 40 to the other lower chine, take the average, which is 42 gallons. If the barrel is full up to the bung, there will be 42 gallons in it. If not full, and you wish to know how much is out, put the Wantage Rod, straight down into the bung-hole until the little brass plate on one side of it comes under the stave at the point A, as in above illustration. Be careful and not let the rod go below that point; withdraw it, and notice at what point it is wet with the liquid. If the package is a tierce of about 42 gallons, find "Tierce, 42" near the end of the rod, and follow that scale down to where it is wet. That figure will

show how much is out. For instance, if it is at the figure 4, it shows 4 gallons out, which, deducted from 42, leaves 38 gallons to pay for. "B. D." on this rod means bung diameter. Thus "42 B. D. 22" means that a barrel of 42 gallons has a bung diameter of 22 inches. The bung diameter is ascertained by putting the gauge rod into the bung-hole and let it drop directly down until it touches the opposite stave; then place your finger on the inch scale of the rod at the underside of the stave and middle of the bung-hole, at point A.

## BARREL MARKS.

The above cut is a *fac simile* of the gauge marks as ordinarily found upon hogsheads and barrels. They will vary slightly, as made by different markers. Confusion often arises in reading them, owing to several marks having been made upon the same package, more especially hogsheads that have been used more than once. A little practice will make a person familiar with the above figures, while the gauge and wantage rods will enable the dealer to test their accuracy.

GAUGE ROD.

WANTAGE ROD.

*Gauge Rod.—Wantage Rod.*

Best Steel Point, Ivory face.....	\$3.00
“ Brass “ “ .....	2.00
Second Best Brass Point, Ivory face.....	1.30
Common 3 ft. 120 gallon .....	.50
“ 3½ ft. 200 “ .....	.65
“ 4 ft. 300 “ .....	.75

Any of the above, with brass joint in the middle, rendering it perfectly safe by mail, and convenient for keeping in a drawer, 20 cents extra.

Milk Can Gauge Rod for 20, 30 and 40 quart cans.....	\$0.65
Best 12-line Wantage Rod .....	1.00
“ 8-line “ “ .....	.70
Common 12-line Wantage Rod .....	1.00
“ 8-line “ “ .....	.70

When ordered to be sent by mail, 20 cents extra must be enclosed to pre pay postage.

The above rods can be procured of A. B. WOOD, dealer in Grocers' Outfits and Findings, 28 West Broadway, New York.

## THE DECIMAL SYSTEM of WEIGHTS and MEASURES.

A permissive law has already been passed by the American and British Governments, adopting the decimal system as applied to weights and measures. It is substantially the same as the French decimal system, and founded on units of the same value. The multiples and sub-divisions of the different units are the same; Greek prefixes being used to denote the multiples, and Latin prefixes the fractional parts of the units.

The Greek prefix	DEKA	means	10	units.
“ “ “	HECTO	“	100	“
“ “ “	KILO	“	1000	“
“ “ “	MYRIA	“	10000	“
The Latin prefix	DECI	“	$\frac{1}{10}$	“
“ “ “	CENTI	“	$\frac{1}{100}$	“
“ “ “	MILLI	“	$\frac{1}{1000}$	“

The fundamental unit of all the decimal weights and measures is the METRE; the standard length of which is 39.371 inches.

*Value of Metric Measures of Length in Long Measure.*

	Miles.	Yards.	Feet.	Inches.
Myriametre —	6	376	1	2
Kilometre —		1093	1	11
Hectometre —		109	1	1.1
Dekametre —		10	2	9.71
Metre —		1	0	3.371
Decimetre —				3.937
Centimetre —				.394

For general purposes, or small calculations, the following equivalents will be found sufficiently accurate: 1 millimetre is equal to  $\frac{1}{25}$  inch; 1 centimetre is equal to  $\frac{2}{5}$  inch; 1 decimetre is equal to  $3\frac{9}{10}$  inches; 1 metre is equal to  $39\frac{1}{2}$  inches;  $\frac{2.1}{10}$  metre is equal to 36 inches or 1 yard.

*Value of Metric Measures of Capacity in U. S. Dry Measure.*

	Bush.	Peck.	Quart.	Pint.
Kilolitre —	28	1	$4\frac{1}{4}$	
Hectolitre —	2	3	2	1.6
Dekalitre —		1	0	1.6
Litre —				1.816
Decilitre —				.181
Centilitre —				.018

*Value of Metric Measures of Capacity in U. S. Liquid Measure.*

	Gals.	Quarts.	Pints.	Gills.
Kilolitre —	264	0	1	1.6
Hectolitre —	26	1	1	1.36
Dekalitre —	2	2	1	0.136
Litre —		1	0	0.413
Decilitre —				.841
Centilitre —				.084

*Equivalent of Metric Measures of Capacity in U. S. Apo. Measure.*

	Gall.	Pint.	Fluid Ounce.	Fluid Drachm.	Minims.
Hectolitre	— 26	3	5	5	20
Dekalitre	— 2	5	2	1	20
Litre	—	2	1	6	32
Decilitre	—		3	3	3
Centilitre	—			2	42

The following are approximate values, correct enough for rough calculations. One millilitre is equal to  $15\frac{1}{2}$  minims water; one centilitre is equal to 3 fluid drachms; one decilitre is equal to  $3\frac{1}{2}$  fluid ounces; one litre is equal to  $2\frac{1}{10}$  pints; one cubic centimetre of water at its maximum density weighs  $15\frac{1}{2}$  grains, and is  $\frac{2}{7}$  fluid drachm.

*Equivalent of Metric Weights in Avoirdupois Weight.*

	Lbs.	Oz.	Dr.
Millier	— 2204	9	1.6
Quintal	— 220	7	4.96
Myriagram	— 22	0	11.69
Kilogram	— 2	3	4.37
Hectogram	—	3	8.44
Dekagram	—		5.64
Gram	—		.56

*Equivalent of Metric Weights in U. S. Apothecaries Weight.*

	Lbs.	Oz.	Dr.	Scr.	Grs.
Millier	— 2677	1	7	2	16.
Quintal	— 267	8	4	2	7.6
Myriagram	— 26	9	2	0	4.77
Kilogram	— 2	8	1	0	0.48
Hectogram	—	3	1	2	2.05
Dekagram	—		2	1	14.21
Gram	—				15.43
Decigram	—				1.54

For general purposes the following values are sufficiently correct: 1 milligram is equal to  $\frac{1}{80}$  grain; 1 centigram is equal to  $\frac{1}{8}$

grain; 1 decigram is equal to  $1\frac{1}{2}$  grains; 1 gram is equal to  $15\frac{1}{2}$  grains; 1 dekagram is equal to 154 grains; 1 hectogram is equal to 1,543 grains; 1 kilogram is equal to 15,432 grains.

Apothecaries.	Avoirdupois.	
	Oz.	Dr.
1 pound	=	13
1 ounce	=	1
1 drachm	=	2.19
1 scruple	=	0.73

*Relative Value of Imperial Measure and United States Standard Apothecaries Measure.*

	Gal.	Pint.	Fl. oz.	Fl. dr.	Minim.
1 Imp. gallon	= 1	1	9	5	7.66
1 " pint	=	1	3	1	38.45
1 " fluid ounce	=			7	40.92
1 " fluid drachm	=				57.62
1 " minim	=				.96

APOTHECARIES' FLUID MEASURE.

Sixty minims or drops make one fluid drachm.

Eight fluid drachms make one fluid ounce.

Sixteen fluid ounces make one pint.

Eight pints make one gallon.

## APPROXIMATE MEASURES.

The following rule, although not exact, is considered safe for general domestic practice :

Sixty drops equal one tea-spoonful, or one fluid drachm.

One teaspoonful equals one fluid drachm, or sixty drops.

Four tea-spoonfuls equal one table-spoonful, or half a fluid ounce.

Half a fluid ounce equals one table-spoonful, or four tea-spoonfuls.

Two table-spoonfuls equal one fluid ounce, or eight tea-spoonfuls.

One fluid ounce equals two table-spoonfuls.

A tea-cupful equals four fluid ounces.

A wine-glassful equals one-half gill, or two fluid ounces.

## APOTHECARIES' WEIGHTS.

Twenty grains make one scruple.

Three scruples make one drachm.

Eight drachms make one ounce.

Twelve ounces make one pound Troy.

The Troy pound contains 5760 grains. The avoirdupois pound contains 7000 grains. To make the avoirdupois ounce equal the Troy, add  $42\frac{1}{2}$  grains. To reduce the avoirdupois pound to Troy, deduct 1240 grains.

## GAUBIUS' TABLE,

OF PROPORTIONAL DOSES ACCORDING TO AGE.

For an adult suppose the dose to be 1 or 1 drachm.

Under 1 year will require  $\frac{1}{12}$  or 5 grains.

" 2 years " "  $\frac{1}{8}$  " 8 "

" 3 " " "  $\frac{1}{6}$  " 10 "

" 4 " " "  $\frac{1}{4}$  " 15 "

" 7 " " "  $\frac{1}{2}$  " 1 scruple.

" 14 " " "  $\frac{1}{2}$  "  $\frac{1}{2}$  drachm.

" 20 " " "  $\frac{2}{3}$  " 2 scruples.

From 21 to 60 the full dose, or 1 or 1 drachm.

Above this age, an inverse gradation must be observed.

## MEASUREMENT OF STONE AND BRICK WORK.

## 1 Perch, Masons' or Quarrymen's Measure.

16½ feet long, }  
 16 inches wide, } = 22 cubic feet. To be measured in wall.  
 12 inches high, }

16½ feet long, }  
 18 inches wide, } = 24.75 cubic feet. To be measured in pile.  
 12 inches high, }

1 cubic yard = 3 feet x 3 feet x 3 feet = 27 cubic feet. The cubic yard has become the standard for all contract work of late years. Stone walls less than 16 inches thick count as if 16 inches thick to mason; over 16 inches thick, each inch additional is measured.

*Number of Bricks required in Walls for each Square Foot of Face of Wall.*

Thickness of Wall.	Thickness of Wall.
4 inches..... 7½	24 inches..... 46
8 " ..... 15	28 " ..... 52½
12 " ..... 22½	32 " ..... 60
16 " ..... 30	36 " ..... 67½
20 " ..... 37½	42 " ..... 75

Cubic yard = 600 bricks in wall.

Perch (22 cubic feet) = 500 bricks in wall.

To pave 1 square yard on flat requires 41 bricks.

" 1 " " " edge " 68 "

## HOW TO FIND THE CAPACITY OF A ROUND CAN.

To find the capacity of a cylindrical vessel, for instance, an oil or milk can, multiply the square of the diameter by the length in inches, and that product by the decimal .0034, and it will give you the capacity in gallons.

*Example*—What would be the capacity of a can 18 inches in diameter and 30 inches deep?

18 multiplied by 18 equals 324, multiplied by 30 equals 9,720, multiplied by .0034 equals 33.04 gallons.

What would be the contents if the oil was 20 inches deep?

324 multiplied by 20 equals 6,480, multiplied by .0034 equals 22.03 gallons.

## WEIGHTS AND MEASURES

AS RECOGNIZED BY THE LAWS OF THE UNITED STATES.

<i>Bush.</i>	<i>Lbs.</i>	<i>Bush.</i>	<i>Lbs.</i>

Oil, Castor, .....		7 $\frac{3}{4}$ lbs. to the gallon.	
"    Linseed, .....		7 $\frac{1}{2}$ lbs. " "	
"    Olive, .....		7 $\frac{1}{2}$ lbs. " "	
<hr/>			
A box 24 x 16 inches, 22 deep, contains.....			1 barrel.
"    16 x 16 $\frac{1}{2}$ "    8 "    "    .....			1 bushel.
"    8 x 8 $\frac{1}{2}$ "    8 "    "    .....			1 peck.
"    8 x 8 "    4 $\frac{1}{2}$ "    "    .....			$\frac{1}{2}$ peck.
"    4 x 4 "    4 1-10 "    .....			1 quart.

The standard bushel of the United States contains 2150.4 cubic inches. The "Imperial bushel" is about 68 cubic inches more. Any box or measure, the contents of which are equal to 2150.4 cubic inches, will hold a bushel of grain. In measuring fruit, vegetables, coal, and other substances, one-fifth must be added. In other words, a peck measure five times even full makes one bushel. The usual practice is to heap the measure.

## DRUGGISTS' GLASSWARE.

Table showing the number of DOZENS usually packed in each box of Flint and Green Glassware, and which must be ordered to secure the best discount.

	$\frac{1}{2}$ and 1 oz.	2 oz.	4 oz.	6 oz.	8 oz.	16 oz.

Imperial.....	22 x 32 "	Dbl. Elephant,...	.27 x 40 "

A sheet folded in 2 leaves is a folio.

"	"	4	"	"	a quarto.
"	"	8	"	"	an octavo.
"	"	12	"	"	a 12 mo.
"	"	16	"	"	a 16 mo.

24 sheets make 1 quire, 20 quires make 1 ream, 2 reams make 1 bundle, 5 bundles make 1 bale.

## WHAT CONSTITUTES A CAR LOAD.

In general, 20,000 pounds is a car load—it is also 70 barrels of salt, 70 to 100 of lime, 100 of flour, 60 of whiskey, 200 sacks of flour, 6 cords of hard wood, 7 of soft, 18 to 20 head of cattle, 50 to 60 head of hogs, 80 to 100 head of sheep, 8,000 feet of dressed boards, 400 bundles of lath, 80,000 shingles, one-half less of hard lumber, one-quarter less of green lumber, one-quarter less of joists, scantling, and all other large lumber; 340 bushels wheat, 400 of corn, 640 of oats, 420 of barley, 360 of flax seed, 360 of apples, 400 of Irish potatoes, and 1,000 bushels of bran. The foregoing table may not be exactly correct, for the reason that railroads do not agree in their rules and estimates, but it approximates so closely to the average that shippers will find it a great convenience as a matter of reference.

## DRUGGISTS' SHOW COLORS.

The receipts here given are among the very best for this purpose. The mixtures require careful filtration, and usually will need a second filtration in a few weeks, after which they will remain clear and brilliant.

**AMBER.**—Dragon's Blood, two ounces, Sulphuric Acid, eight ounces. Digest together until dissolved, then dilute with water to the desired shade, and filter.

**INDIGO BLUE.**—Take sufficient of Sulphate of Indigo (Chemic Blue), and dilute with water to the shade required, and filter.

**PRUSSIAN BLUE.**—Dissolve Box Blueing in water, and dilute to the shade required.

**LIGHT BLUE.**—Take of Sulphate of Copper, eight ounces, water, a gallon; dissolve and filter. The addition of Solution of Ammonia renders it more decidedly blue.

**GREEN.**—An excellent green is made by adding a little Bichromate of Potash to the last receipt for Blue. Another way is to add four ounces of common salt to a solution of two ounces of Blue Vitriol in a pint of water. The following is good:

Take of Carbonate of Copper, eight ounces, Muriatic Acid, two pints, water, a gallon. Dissolve the Copper salt in the Acid, and add the water. This Solution has a splendid light green color.

**PINK.**—Dissolve one-fourth ounce of Carmine in two ounces of Aqua Ammonia, and dilute to the required shade.

**RED.**—Iodide of Potassium, one-half ounce, Iodine, two drachms, water, a gallon. Dissolve the Iodide and Iodine in two ounces of water, and add the water.

*A yellowish red* may be made with a strong solution of Bichromate of Potassa.

*A bright red* is made as follows: Cochineal, ground, one ounce. Boil with one pint of water, replacing what evaporates, for one-half hour. Then add Cream Tartar, one-half ounce, Alum, one ounce, and when cold one-fourth ounce oil of vitriol diluted with one-half pint of water. Filter carefully.

**PURPLE.**—To the last receipt for Red add enough of the first Blue to give the desired shade.

**YELLOW.**—Take of Bichromate of Potassa, three ounces, Carbonate of Soda, three ounces, water, a gallon. Dissolve the Bichromate of Potassa in half a gallon, and the Soda in a pint of water; pour the latter solution slowly into the former, and when the evolution of Carbonic Acid ceases, add the rest of the water.

A darker yellow is made by using Muriatic Acid instead of Carbonate of Soda.

## SYRUPS FOR SODA OR MINERAL WATERS.

The following is a collection of well approved receipts for flavoring mineral waters. Most of the syrups not made from fruits may have a little gum arabic added, in order to produce a rich froth when the soda water is added.

**SIMPLE SYRUP.**—White sugar, 10 pounds; water, 1 gallon; isinglass (best),  $\frac{1}{4}$  ounce (or, the white of an egg). Dissolve the isinglass in hot water, and add it to the hot syrup. The syrup is to be made with gentle heat, not boiled, and then strained.

**LEMON SYRUP.**—Add to simple syrup when cold, 20 drops fresh oil of lemon and  $\frac{1}{2}$  ounce citric acid (previously dissolved in three ounces water) to each gallon. Mix by shaking well in a bottle, then add 4 ounces gum solution, made by dissolving 2 ounces fine white gum arabic in 2 ounces warm water.

**SARSAPARILLA SYRUP.**—To  $\frac{1}{2}$  gallon simple syrup add  $\frac{1}{2}$  gallon sugar house syrup and 10 drops oil of anise, 20 drops oil of wintergreen, 20 drops oil of sassafras. Before the oils are added to the syrup, they should be mixed with a small quantity of strong alcohol.

**GINGER SYRUP.**—Tincture of ginger, 2 fluid ounces; simple syrup, 4 pints; mix.

**VANILLA SYRUP.**—Fluid extract of vanilla, 1 ounce; citric acid,  $\frac{1}{2}$  ounce; simple syrup, 1 gallon; rub the acid with some of the syrup, add the extract of vanilla, and mix.

**STRAWBERRY SYRUP.**—Select fine ripe field berries, pick them over carefully, mash, and press out the juice. Let it stand at a temperature of about 70° until fermentation has commenced and the pectin separated as a scum on top. This will take two

or three days. A cellar will be the best place to keep it. Remove the scum and strain through flannel. Add an equal amount of water to the juice, then make it into a syrup with four pounds of sugar to each quart of liquid. Heat it to boiling, skim, and strain while hot into gallon jugs. These should be securely corked and sealed, and it will then keep perfectly until wanted. It is usually mixed with an equal quantity of simple syrup when wanted for use.

**STRAWBERRY SYRUP.**—Take fresh strawberries, 5 quarts; white sugar, 12 pounds; water, 1 pint. Sprinkle some of the sugar over the fruit in layers, and allow the whole to stand for several hours; express the juice and strain, washing out the pulp with water; add the remainder of sugar and water, bring the fluid to the point of boiling, and then strain. This will keep for a long time.

**STRAWBERRY SYRUP.** From the Preserved Juice. Strawberry juice, 1 pint; simple syrup, 3 pints; solution of citric acid, (*see Fruit Acid*), 2 drachms; mix.

**FRUIT ACID,** (used in some of the syrups). Citric Acid, 4 ounces; water, 8 ounces.

**STRAWBERRY SYRUP WITHOUT THE FRUIT.**—Add to 1 gallon simple syrup,  $\frac{1}{2}$  ounce conc. essence of strawberry, and  $\frac{1}{4}$  ounce tartaric acid. Color with coloring made as follows: Boil 1 ounce cochineal with  $\frac{1}{2}$  teaspoonful cream of tartar. Strain.

**RASPBERRY SYRUP.**—Make as directed for strawberry syrup, either with the fruit or the conc. essence, or juice. The flavor of this syrup is improved by using 1 pint currants to 5 of raspberries.

**BLACKBERRY SYRUP.**—Make as directed for strawberry, and add to each quart 1 ounce of the best French brandy.

**PINEAPPLE SYRUP.**—Take a convenient number of pineapples, pare and mash them in a marble or porcelain mortar, with a small quantity of sugar; express the juice, and for each quart take  $1\frac{1}{2}$  pints water and 6 pounds fine sugar; boil the sugar and water, then add the juice; remove from the fire, and skim and strain. Or make it with the juice or conc. essence, as directed for strawberry.

**WINTERGREEN SYRUP.**—Oil of wintergreen, 25 drops; simple syrup, 5 pints; sufficient burnt sugar to color. Mix.

**MAPLE SYRUP.**—Take maple sugar, 4 pounds; water 2 pints.

**CHOCOLATE SYRUP.**—Mix 8 ounces chocolate in 2 pints water, and stir thoroughly over a slow fire. Strain, and add 4 pounds white sugar.

**ORANGE SYRUP.**—Take a convenient number of fresh and ripe oranges, grate off the outside yellow peel; cut the oranges, and express the juice; and to each quart add 1 pint water and 6 pounds sugar, previously well mixed with the grated peel. Dissolve by gentle heat, then strain.

**COFFEE SYRUP.**—Coffee, roasted, 1 pound; boiling water, *q. s.* to percolate, 1 gallon, to which add granulated sugar, 10 pounds.

**NECTAR SYRUP.**—Vanilla syrup, 5 pints; pineapple syrup, 1 pint; strawberry, raspberry, or lemon syrup, 2 pints. Mix.

**SHERBET SYRUP.**—Vanilla syrup, 3 pints; pineapple syrup, 1 pint; lemon syrup, 1 pint. Mix.

**CREAM SYRUPS.**—These are prepared by mixing highly flavored syrups with fresh cream. As this latter does not keep well, it is a more economical plan to make a simple cream syrup in suitable quantities, and to add a portion of it to the flavored syrup as required. This prevents the loss of different flavored syrups by spoiling, and allows of the cream being used for any flavored syrup.

**CREAM SYRUP.**—Take of fresh milk, 2 pints; fine powdered sugar, 3 pounds; beat the yolks of 2 eggs, then mix with the milk and sugar and bring to a boil. Keep in a cool place, well bottled.

## RECEIPTS FOR INKS.

**LEAMON'S DYES** make very superior Inks of all colors, at a very small cost. They are fully equal to the inks sold at high prices in small bottles. We guarantee satisfaction when the directions are carefully followed.

**BLACK INK.**—Take two gallons of boiling water, and put into it one bottle of *Leamon's Black Dye*. Rinse the bottle out with warm water, and add to it. Now add one-fourth ounce of bichromate of potash, and one-eighth ounce prussiate potash, pounded fine; stir until dissolved, and your ink is ready for use. This makes a deep black ink that flows beautifully, and can be used for any purpose, except copying, and will cost but fifteen cents a gallon.

**WATER FOR COLORED INKS.**—To make any of the colored inks, there must be dissolved in each quart of boiling water, one-half ounce white gum arabic.

**VIOLET INK.**—Add one box of *Violet Dye* to two quarts of boiling water prepared as above. This makes an ink of beautiful color, that will not fade or thicken, does not corrode steel pens, is not injured by freezing, and writes splendidly. None better can be made. An addition of eight ounces of sugar and four ounces of glycerine will make an excellent copying ink.

**MAGENTA OR CARMINE INK.**—Dissolve one ounce of gum arabic in one-half gallon boiling water. Add to this the dye in the paper box, which will at once dissolve. This will make as good red or carmine ink as can be bought, and will cost but fifteen cents per quart.

**BLUE, PURPLE, MAUVE, and CRIMSON INKS,** can be made from the various dyes in the same manner.

**STENCIL INK.**—Add one bottle of Leamon's Black Dye (large) to three quarts of *boiling* water. Now add one-half ounce of bi-chromate of potash, and one-fourth ounce prussiate potash, pounded fine; stir until dissolved, and your ink is ready for use. An addition of one-half ounce solution carbolic acid will prevent any moulding or spoiling. Put a sponge into a tin cup and pour on this Ink until it is well wet. The Stencil Brush will then take up just enough of it to stencil nicely. No other stencil ink is so cheap, and none is superior.

If you wish to use colored stencil inks Leamon's Dyes make the brightest and best. Send for full directions.

## DYE STUFFS.

We copy the following from "Austin's Domestic Hand Book," Page 381: "A series of experiments has convinced us that Leamon's Dyes, (made by Wells, Richardson & Co., Burlington, Vt.), which are now having an extensive sale in the market, are certainly the best and cheapest that have ever been offered to the public. Indeed, we think that by their use we have obtained more brilliant and durable results than are commonly produced by professional dyers; while by no chemical test that is familiar to us have we been able to detect any poisonous element in their composition. For this reason we take pleasure in commending them to our readers, the youngest of whom can operate with them with entire satisfaction. A different dye is furnished for every shade, and accompanying every package are full and explicit directions how to use. It makes no difference what is to be dyed,—whether cloth, feathers, leather, wax, wood, ivory, hair, shells, kid gloves, or paper,—Leamon's Dyes will do it thoroughly and in the best style."

### AMOUNT OF COMMON DYE STUFFS REQUIRED TO COLOR TWO POUNDS OF WOOLEN GOODS.

- Black.* 1½ pounds logwood, 2 ounces Bichromate Potash, 1 ounce alum.
- Brown.* 1 pound Fustic, ½ pound Camwood, 2 ounces Logwood, 1 ounce Copperas.
- Or, ½ pound Fustic, ½ pound Madder, ¼ pound Redwood, 1 ounce Logwood, ½ ounce Copperas.
- Or, ½ pound Catechu, 1½ ounces Bichromate Potash, 1 ounce Sugar Lead.
- Scarlet.* 3 ounces Cochineal, 3 ounces Cream Tartar, 6 ounces Solution Muriate of Tin.
- Green.* 2 pounds Fustic, 7 ounces Alum, 4 ounces Chemic Blue.
- Blue.* 5 ounces Alum, 3 ounces Cream Tartar, 4 ounces Chemic Blue.
- Yellow.* 2 ounces Sugar Lead, 1 ounce Bichromate Potash.
- Red.* ½ pound Redwood, 2 ounces Solution Muriate Tin.
- Madder Red.* 1 pound Madder, 2 ounces Madder Compound.

RECEIPTS  
FOR DYEING WITH REFINED GUM CATECHU,  
(IN PACKAGES.)

One pound of Catechu will color from four to ten pounds of goods, according to shade—dark shades requiring much more than light.

*To prepare Catechu and dye Brown.*—Chop it up into small pieces, and boil one pound in about two pails of water, until dissolved. Add to it two ounces of Blue Vitriol and stir until it dissolves, when it is ready for use. Now work the goods in this liquor for one or two hours, at boiling heat. Then, for each pound of Catechu dissolve, in another kettle, three ounces of Bichromate of Potash in sufficient hot water to cover the goods. Work in this half an hour, then wash in water having in a little soap. On wool this color is very deep, but lighter on cotton.

By using Copperas or Sugar of Lead instead of Bichromate of Potash, and a quarter of the quantity of Catechu very good fawns may be made. Some add a little of Sugar of Lead to the Potash when dyeing Brown, or use Alum instead of Blue Vitriol in the first liquor.

Catechu makes a very fast color on both cotton and woolen.

*Directions for attaching Glass Labels to Bottles, Jars, etc.*

**CEMENT.**—To one part of Yellow Wax add three of Resin; melt it together in an open pan or kettle, with a gentle heat, to the consistency of syrup.

**DIRECTIONS.**—Place the bottle upon a table in a horizontal position, in front of you; the bottle must be perfectly free from moisture. Pour the Cement on to the hollow side of the Label, with a spoon; then apply the label to the bottle with a gentle pressure. While the Cement is soft run the edge of a knife around the label so as to form a groove in the Cement; this will save labor in chipping off the Cement. The Cement will dry in about ten minutes, when, with a putty knife, such as glaziers use, remove the surplus Cement. Clean bottle and label with a little whiting and kerosene oil; wipe off with a damp towel.

In order to insure uniformity in attaching the labels, a gauge should be made of wood for each size bottle, to measure from the bottom of the bottle to the bottom of the label. Any of the labels may be removed by heating the label and bottle before a slow fire until the Cement becomes soft.

## ABBREVIATIONS AND SYMBOLS USED IN PRESCRIPTIONS.

Minim. One-sixtieth part of a fluid drachm.

Gutta. A drop.

Scrupulus. A scruple — 20 grains.

Drachma. A drachm — 60 grains.

Fluid drachma. A fluid or measured drachm.

Uncia. A Troy ounce. 480 grains.

Fluiduncia. A fluid ounce.

Libra. A pound, understood in prescriptions to apply to an officinal pound of 5760 grains.

O. Octarius. A pint.

Cong. Congius. A gallon.

Gr. Granum. A grain; plural, grana, grains.

Ss. Semis. Half; affixed to signs as above.

The Latin numerals are employed in prescriptions—i, ij, iij, iv, v, vi, viij, ix, x, xi, xij, xv, xx, xl, l, c, etc.

R. Recipe. Take.

Garg. Gargarysma. A gargle.

aa. Ana. Of each.

Haust. Haustus. A draught.

Ad libitum. At pleasure.

Infus. Infusum. An infusion.

# CHEMICALS.

We beg to call the attention of our Customers to the excellent quality of the Chemicals with which we have supplied them for many years. They have been almost exclusively of the manufacture of Messrs Powers & Weightmore the well known chemists of Philadelphia, whose reputation for pure and reliable goods is world wide.

They have given our customers and ourselves such complete satisfaction that we shall continue to use them exclusively in the future. Our Opium, both Gum and Powdered, is of P. & W.'s selection, and can be relied on as the very best obtainable, always containing the full percentage of morphia. We keep only P. & W.'s. Pure Cream Tartar, Tartaric Acid, Rochelle Salt, Iodide Potash, Bromide Potash, and Sulph. Morphia.

Especial attention is asked to the Cinchona alkaloids of their manufacture, and to the following list of their chemicals :

Cinchona, Sulph.	Ether, Sulph., Conc.
Cinchonidia, Sulph.	Chloroform, pure.
Quinia, Sulph.	Bismuth, Subnitrate.
Quinia, Bi. Sulph.	Bismuth, Subcarbonate.
Quinidia, Sulph.	Pil. Hydrarg.
Quinia, Citrate, with Iron.	Calomel.
Silver, Nitrate, Crystals, pure.	Salacin.
Silver, Nitrate, Fused.	Strychnia.

# LEAMON'S DYES!

The Best and most Successful Family Dyes ever Introduced.

They are the only Dyes advertised in the newspapers and ladies' journals. They are the only kind that is called for by the public. They color the largest amount and give the best colors of any Dyes ever invented.

Out of the Black Walnut Case we give with the first order for One Gross.  
Size sixteen inches square, eight inches high.

**WE GIVE** The handsomest printing, the most beautiful sample cards, and the best black walnut show case. Our book entitled "Every Lady a Practical Dyer," which we give with the imprint of the dealer, is unique, and very efficient.

## TRIAL PACKAGE SIZE.

We find there is a demand springing up in some quarters for a small package dyes. To meet this demand we have prepared a trial size (15 cts.), put up in cartoons. The price is 90 cts. per dozen. If you have any demand for a small package Dye, you should put in a stock of these, as they give the most dye, and the best colors, for the least money.

Regular size (25c.) \$1 75 per doz. They contain a very large quantity of Dye, and never fail to give satisfaction.

WELLS, RICHARDSON & CO.,

PROPRIETORS,

BURLINGTON. - - - VERMONT.

# LEAMON'S DYES.

## ADVANTAGES FOR THE TRADE.

**ONLY TWELVE KINDS.**—But from these twelve kinds any shade or color wanted can be made, as will be seen by referring to list of colors.

**SUPERIOR QUALITY.**—We claim Leamon's Dyes the best of any family dyes ever invented, especially as now prepared. Thousands of gross have been sold and used with the greatest satisfaction. The very finest quality of Aniline only being used, they are much better and cheaper than the common crystal, while they are warranted to be free from all poisonous effects, such as are sometimes experienced from cheap Dyes.

**FINEST STYLE.**—In style they are far superior to any other dyes on the market—each size being put up in handsome cartons.

**MOST PROFITABLE.**—They are the cheapest in price of any dyes in the market, and afford a profit of nearly 100 per cent. They enable the dealer to do away entirely with the disagreeable trade in crystal, and at the same time a full stock of Anilines can be carried with much less capital. The profit on each sale is also larger, as a package can be as easily sold as ten cents worth of crystal.

**ADVERTISED.**—We are advertising them very largely in all ladies' journals and magazines, and in a great many of the best religious and local papers.

**PRINTED MATTER.**—We give a liberal amount of handsomely printed books and circulars with the Dealers card on.

**SAMPLE CARD.**—Our new sample card is very attractive. It shows 26 shades and colors from the twelve Dyes. It is in glass passe-partout frame to sit on the counter, and has in the center a handsome baby photograph taken from life. It will attract every lady's attention.

## ADVANTAGES FOR THE CONSUMER.

**FIRST.**—They color a larger amount of goods than any other, each package coloring from one to four pounds of goods, according to the shade wished.

**SECOND.**—They are prepared ready for use, and are therefore much easier and much simpler to use than any other.

**THIRD.**—Each dye produces any shade, light or dark, of that color; and combining dyes are given to produce any different tint that may be wanted.

**FOURTH.**—They can be used for all kinds of fabrics, and do not require any different dyes for different articles.

**FIFTH.**—They give the brightest and best colors to all fancy work, such as feathers, flowers, everlasting flowers, fancy wood frames, or sea shells, scales, hair, seaweed, rice, &c., when used in fancy work.

**SIXTH.**—Leamon's Dyes being made from the finest qualities of Anilines they are warranted free from all poisonous effect. They are much safer to use than most of the cheap dye-stuffs, or Anilines sold in bulk.

## Three Million Dollars!

Can be saved every year by the Farmers of this Country if they will properly Color their butter

-BY USING-

# WELLS, RICHARDSON & CO.'S Perfected Butter Color.

It gives a pure, rich dandelion color!

It adds 5 cents per pound to the value of Butter!

It imparts no taste or smell!

It is pure, intense, permanent, economical and as

## HARMLESS AS SALT.

Our Perfected Butter Color is far better than carrots, annatto or any other color, at one fourth the cost, and no work to use. It gives a pure dandelion color, and never turns red or rancid, but tends to improve and preserve the butter. Warranted to add five cents per pound to its selling value. Nothing has ever been introduced that so quickly responds to a little effort, and for which a demand can so easily be created. We furnish ample supply of handsome circulars and posters.

Note that above Trade Mark is on Surrounding Wrapper of Bottle.

NONE OTHER IS GENUINE.

**CAUTION! CAUTION!**

POND'S EXTRACT has obtained an immense sale owing to its beneficent qualities, and, like everything else that is well patronized by the public has been imitated. The trade is cautioned against purchasing in place of POND'S EXTRACT such articles as Compound Extract, Concentrated Witch Hazel, Double Distilled Extract, etc. There are no such preparations as "Double Distilled" and "Extra Strong" qualities. There is but ONE pure and uniform Extract of Witch Hazel and that is "Pond's Extract," as is amply proven in its use by the best of physicians of ALL schools, and leading Hospitals and Chemists of this Country and Europe.

**EXTRA CAUTION.**

An imitation called Humphrey's Witch Hazel, has been *permanently enjoined* by the Courts, and no Druggist can sell it without being liable for damages. We think it only necessary for us to inform the first-class Druggists of the country to insure their co-operation in protecting the rights of Trade Marks and keeping their consumers from being misled by this imitation as well as others. The association of this name (Humphrey's), with the genuine article, ceased in 1872. POND'S EXTRACT is manufactured by the *only persons living who ever knew how to make it.*

## MERCHANTS' GARGLING OIL!

A LINIMENT FOR MAN AND BEAST.

"Whether for use on man or beast, Merchant's Gargling Oil will be found an invaluable Liniment, and worthy of use by every resident of the land. We know of no proprietary medicine or article now used in the United States which shares the good will of the people to a greater degree than this. Yellow wrapper for animal and white for human flesh."—*N. Y. Independent*.

Extract from a letter from G. H. Simmonds, Unionville, Ia., July 24, 1873.  
"I am selling more Gargling Oil than all the liniments put together, and I am keeping twelve different kinds. I think it is the best remedy for horse flesh in existence, and can say it without fear of successful contradiction."

### Merchant's Gargling Oil as a Family Liniment.

We are now, and have been for some years, preparing the Oil free from stain, to be used as a common liniment for human flesh, extracting the coloring ingredient which has heretofore rendered it objectionable. This Oil possesses all the medicinal properties of that prepared with the dark tinge for horses and cattle, and will be found one of the best remedies for all purposes where a liniment is required that has ever been manufactured.

The Gargling Oil called "Family Oil," although prepared intentionally for human flesh, answers as well for beasts; *vice versa*, the dark Oil answers as well for human flesh, only it will stain and discolor the skin, but not permanently. Yellow wrapper for animal and white for human flesh.

### Merchant's Gargling Oil as an Internal Remedy.

Merchant's Gargling Oil is a diffusible stimulant and carminative. It can be taken internally when such a remedy is indicated, and is a good substitute for pain-killers, cordials and anodynes. For Cramps or Spasms of the Stomach, Colic, Asthma, or Internal Pain, the dose may be from fifteen to twenty drops, on sugar, or mixed with syrup in any convenient form, and repeated at intervals of three to six hours. Yellow wrapper for animal and white for human flesh.

MERCHANT'S GARGLING OIL is the Standard Liniment of the United States. Established 1833. Large size \$1; medium, 50 c.; small, 25 c.; small size for family use, 25 c. Manufactured at Lockport, N. Y., by M. G. O. Co., and sold by all druggists.

# Burr's Patent Nursing Bottle.

THE MOST HEALTHFUL, DURABLE AND CONVENIENT  
NURSING BOTTLE IN THE WORLD.

THE BEST IS THE CHEAPEST.

"In Burr's Improved Nursing Bottle, all objections have been successfully removed."

Burr's Nursing Bottles have been recommended and endorsed by the leading Physicians and Druggists for the *past ten years*.

We supply the trade with *all parts of the bottles, tubes, etc., separately, to replenish, when required, including BURR'S SILVERED WIRE TUBE BRUSH, which is of inestimable value to the infant, as it keeps the tube perfectly sweet and free from acid.*

In the genuine Burr's Improved Nursing Bottle, the Nipple Holder, Tube Connector and Mouth-guard are all ingeniously combined in one piece of hard polished box-wood, or other suitable material for our cheaper styles. It is so constructed that the nipple is very firmly held, yet it can be easily taken off for cleaning the tube, and replaced in an instant. It is almost impossible to get at the tube of the imitation Nursing Bottle in order to clean it with the Tube Brush as it should be.

**CAUTION TO MOTHERS AND NURSES.**—Avoid all Nursing Bottles where the Nipple-holder, Mouth-guard and Tube-connector are of Metal, or are in more than one piece. As spurious imitations have been foisted upon the market by unscrupulous parties, and as some of these comparatively worthless bottles and tubes are still in the market, we caution all purchasers of our bottles and tubes to see that our "Patent Mouth Guard, Nipple and Tube Connector" are all combined in one piece, on which is impressed our Patent Stamp, and that the words "Burr's Patent Nursing Bottle" are blown in the glass bottle.

We manufacture under our Patents and Trade Marks several different styles of Nursing Bottles and fittings, retailing at from 25 to 75 cents, each bearing a distinctive name, as described in our price list. See our circular giving directions for cleansing the bottles, tubes, etc.

# McKesson & Robbins'

# PILLS AND GRANULES,

GELATINE-COATED.

(PROCESS AND MACHINERY PATENTED.)

91, 93 Fulton, 80, 82 and 84 Ann Streets,

NEW YORK.

---

McKesson & Robbins' Pills have met with the universal favor of the medical profession because of their perfect reliability. They are made with the special purpose of furnishing Physicians with a compact, pleasant and **RELIABLE** medium for administering their remedies, and the extensive use of them by the leading members of the profession, shows how fully they have served their purpose and with what appreciation they have been received.

The McKesson & Robbins' Gelatine-Coated Pills are quickly soluble, and the *capsule shape* renders them easy to be swallowed by people who cannot take round pills.

Special attention is called to the Granules of Morphia, Strychnine, Digitalis, and other potent drugs; the greatest care being taken to insure accurate division. A number of new pills have just been added to the list.

In ordering, write McKesson & Robbins' G. C. Pills. Formula Book and Price List sent upon application.

## PURE PAINTS,

*Prepared for Immediate Use.*

---

The comparative cost of Paint made with Pure White Lead and Oil and our PREPARED PAINT, is as follows :

To produce 1 gallon of White Lead Paint, requires  $14\frac{1}{2}$  lbs. of White Lead, strictly pure ;  $5\frac{1}{2}$  pints of Linseed Oil ; 1 lb. of Dryer.

One gallon of Paint made as above will cover only 190 square feet, two coats.

One gallon of our PREPARED PAINT will cover 224 square feet, two coats.

As two coats of our Prepared Paint is fully equal to three coats of Pure White Lead and Oil, it will require  $21\frac{1}{3}$  lbs. of White Lead ;  $8\frac{1}{3}$  pints of Oil ;  $1\frac{1}{2}$  lbs. of Dryer, to produce a quantity of Paint sufficient to cover the same surface and do it as well as one gallon of our Paint.

---

### OUR GUARANTEE.

*Any building that is not satisfactory when painted with our PREPARED PAINTS, we will repaint at our expense with such White Lead or other paints as the property owner may select.*

*This agreement will be promptly fulfilled upon notice from the Dealer that our Paints have not given satisfaction.*

Very respectfully,

WADSWORTH, MARTINEZ & LONGMAN.

## Wistar's Balsam of Wild Cherry.

The standard remedy for the cure of COUGHS, COLDS, INFLUENZA, BRONCHITIS, HOARSENESS, ASTHMA, WHOOPING COUGH, CROUP, SORE THROAT, DIFFICULTY OF BREATHING, PHTHISIC, QUINSY, PAIN IN THE SIDE AND BREAST, SPITTING OF BLOOD, LIVER COMPLAINT, BLEEDING OF THE LUNGS, and ALL DISEASES OF THE THROAT, LUNGS, and CHEST, including even CONSUMPTION. It seems hardly necessary to dilate at length upon the virtues of this favorite remedy for all diseases of the lungs, throat and chest. It was introduced to the public by Dr. Wistar nearly a half a century since, and by the wonderful cures which it performed, gained an immediate and enviable reputation, which to this day it has fully sustained. From the gulf of the St. Lawrence to the shores of the Pacific, and in many countries abroad, there are few villages or hamlets without "living testimonials" to the rapidity and certainty of its curative effects. The proprietors, mindful of their responsibility to the afflicted, exercise the utmost care in the selection and compounding of the various ingredients of which the BALSAM is composed; and the sick are assured that the high standard of excellence on which its popularity is based, will always be maintained. Prepared by SETH W. FOWLE & SONS, Boston. Sold by all Druggists.

## The Peruvian Syrup,

A Protected Solution of the Protoxide of Iron, is so combined as to have the character of an aliment, as easily digested and assimilated with the blood as the simplest food. It increases the quantity of Nature's Own Vitalizing Agent, Iron in the blood, and cures "a thousand ills," simply by Toning up, Invigorating and Vitalizing the System. The enriched and vitalized blood permeates every part of the body, repairing damages and waste, searching out morbid secretions, and leaving nothing for disease to feed upon. This is the secret of the wonderful success of this remedy in curing DYSPEPSIA, LIVER COMPLAINT, DROPSY, CHRONIC DIARRHOEA, BOILS, NERVOUS AFFECTIONS, CHILLS and FEVERS, HUMORS, LOSS OF CONSTITUTIONAL VIGOR, DISEASES OF THE KIDNEYS and BLADDER, FEMALE COMPLAINTS, and all diseases originating in a bad state of the blood, or accompanied by debility or a low state of the system. Being free from Alcohol, in any form, its energizing effects are not followed by corresponding reaction, but are permanent, infusing strength, vigor, and new life into all parts of the system, and building up an Iron Constitution. Prepared by SETH W. FOWLE & SONS, Boston, and sold by all Druggists, and by WELLS, RICHARDSON & Co., Burlington, Vt.

Strengthening.

DR. HERRICK'S  
PERFORATED  
PLASTERS

Pleasant.

Soothing.

NATURE'S REMEDY.  
**VEGETINE!**

*Purifies the Blood, Renovates and Invigorates the  
Whole System.*

— oo —  
ITS MEDICAL PROPERTIES ARE

**Alterative, Tonic, Solvent and Diuretic.**

VEGETINE is made exclusively from the juices of carefully selected barks, roots, and herbs, and so strongly concentrated that it will effectually eradicate from the system every taint of SCROFULA, SCROFULOUS HUMOR, TUMORS, CANCER, CANCEROUS HUMOR, ERYSIPELAS, SALT RHEUM, SYPHILITIC DISEASES, CANKER, FAINTNESS AT THE STOMACH, and all diseases that arise from IMPURE BLOOD. SCIATICA, INFLAMMATORY and CHRONIC RHEUMATISM, NEURALGIA, GOUT, and SPINAL COMPLAINTS can only be effectually cured through the blood.

For *Ulcers, and Eruptive Diseases of the Skin, Pustules, Pimples, Blotches, Boils, Tetter, Scald-head, Ring-worm* VEGETINE has never failed to effect a permanent cure.

For *Pains in the Back, Kidney Complaints, Dropsy, Female Weakness, Leucorrhœa*, arising from internal ulceration, uterine diseases, and *general Debility*, VEGETINE acts directly upon the causes of these complaints. It invigorates and strengthens the whole system, acts upon the secretive organs, allays inflammation, cures ulceration, and regulates the bowels.

For *Catarrh, Dyspepsia, Habitual Costiveness, Palpitation of the Heart, Headache, Piles, Nervousness and general prostration of the Nervous System*, no medicine has ever given such perfect satisfaction as the VEGETINE. It purifies the blood, cleanses all of the organs, and possesses a controlling power over the nervous system.

The remarkable cures effected by VEGETINE have induced many physicians and apothecaries whom we know to prescribe and use it in their own families. In fact, VEGETINE is the best remedy yet discovered for the above diseases, and is the only reliable BLOOD PURIFIER yet placed before the public.

BURLINGTON, VERMONT.

# TROMMER'S EXTRACT OF MALT.

The rapidly increasing demand for our IMPROVED EXTRACT OF MALT, during the four years that it has been manufactured and offered to the medical profession in America, justifies the belief that in its production here we are meeting a generally felt want.

Long experience in manufacturing Malt Extract has enabled us to completely overcome the many difficulties attending its manufacture in large quantity; and we positively assure the profession that our Extract of Malt is not only perfectly pure and reliable, but that it will keep for years, in any climate, without fermenting or molding, and that its flavor actually improves by age. Our Extract is guaranteed to equal, in every respect, the best German make, while, by avoiding the expenses of importation, it is afforded at less than half the price of the foreign article.

The Malt from which it is made is obtained by carefully malting the very best quality of selected Toronto, Canada, Barley. The Extract is prepared by an improved process, which prevents injury to its properties or flavor by excess of heat. IT REPRESENTS THE SOLUBLE CONSTITUENTS OF MALT AND HOPS, viz: Malt Sugar, Dextrine, Diastase, Resin and Bitter of Hops, Phosphates of Lime and Magnesia, and Alkaline Salts.

Attention is invited to the following analysis of this Extract, as given by S. H. Douglass, Professor of Chemistry, University of Michigan, Ann Arbor:

*Trommer Extract of Malt Co.*:—I enclose herewith my analysis of your Extract of Malt:

Malt Sugar, 45.1; Dextrine, Hop-bitter, Extractive matter, 23.6; Albuminous Matter (Diastase), 2.69; Ash—Phosphates, 1.712; Alkalies, .377; Water, 25.7; Total, 99.918.

In comparing the above analysis with that of the extract of Malt of the German Pharmacopœa, as given by Hagar, that has been so generally received by the profession, I find it to substantially agree with that article.

Yours truly,

SILAS H. DOUGLASS,

Prof. of Analytical and Applied Chemistry.

This invaluable preparation is highly recommended by the medical profession as a most effective therapeutic agent for the restoration of delicate and exhausted constitutions. It is very nutritious, being rich in both muscle and fat producing materials.

The very large proportion of DIASTASE renders it most effective in those forms of disease originating in *imperfect digestion of the starchy elements of food*. A single dose of the Improved Trommer's Extract of Malt contains a larger quantity of the active properties of Malt than a pint of the best ale or porter; and not having undergone fermentation, is absolutely free from alcohol and carbonic acid.

The dose for adults is from a dessert to a tablespoonful three times daily. It is best taken after meals, pure, or mixed with a glass of milk, or in water, wine, or any kind of spirituous liquor. Each bottle contains *One and one-half Pounds* of the Extract.

Our preparations of Malt are for sale by druggists generally throughout the United States and Canada, at the following prices:

EXTRACT OF MALT, with Hops (plain),	\$1.00
" " " Pyrophosphate of Iron (ferrated),	1.00
" " " Cod Liver Oil,	1.00
" " " Cod Liver Oil and Iodide of Iron,	1.00
" " " Cod Liver Oil and Phosphorus,	1.00
" " " Hypophosphites,	1.50
" " " Iodides,	1.50

SCIENCE AT LAST TRIUMPHANT

# PILES

Or Hemorrhoids

AT LAST

*Safely and Permanently Cured.*

No Mercurial, Anodyne, Astringent or Mineral Poison used  
in the Cure.

The attention of physicians and the public generally is respectfully called to a consideration of the following facts:

That loathsome disease, known as Piles, or Hemorrhoids, has its origin in a diseased function of the liver, induced by several causes, the most prominent of which are: **FIRST**—An unnatural acid condition of the stomach, exhibiting itself in an impaired digestive function, and a greater or less degree of costiveness. **SECOND**—An absence in the blood, in proper proportion, of those peculiar chemical elements that enter into the natural constitution of the secretion of the liver—the bile. **THIRD**—An impaired function of assimilation, arising from a deficiency in the process of digestion, and a consequent condition to a greater or less degree of debility.

## THE UNIVERSAL PILE PILLS

strike at the root of these causes of functional disease of the liver; and, in this harmless, yet certain remedy, is found the only physiological and philosophical solution of this great

### Problem in Medical Science.

The absence of all poisons in the remedy makes it equally safe in the hands of the non-professional, as it is in the hands of the scientific practitioner.

MANUFACTURERS OF

## Varnishes and Japans.

Office, No. 149 Milk Street, Boston, Mass. Factory at E. Boston.

**Wearing Body Varnish,** \$5.00

A very pale Varnish, of great brilliancy, for finishing coats. It is unsurpassed for durability, dries in about fifteen hours. Should be used only over a surface prepared with our Rubbing Body Varnish.

**Elastic Carriage Varnish,** \$4.50

A durable Varnish for finishing coats on running parts. Is very pale, works free, and dries out of the way of dust in fifteen hours. Should be used over our Rubbing Body Varnish.

**One-coat Carriage Varnish,** \$4.00

Not so pale as the Body, but made heavier bodied to cover striping with one coat. Dries in about twelve hours. Very durable.

**Rubbing Body Varnish,** \$4.00

For preparing a smooth, hard surface for our Finishing Varnishes. Dries hard, so as to rub perfectly in seventy-two hours, without sweating. Can be flowed over the largest panels with ease, and is very pale in color.

**Quick Rubbing Body Varnish,** \$4.00

This is a medium between our Rubbing Body and our No. 1 Rubbing. Will work freely, and rub in thirty-six hours, without sweating. As pale in color as our Rubbing Body.

**No. 1 Rubbing Varnish,** \$3.50

This Varnish dries very quick, and rubs well in twenty-four hours, without sweating.

**Japan Gold Size,** \$3.00

A very pale and superior Drier, being double the strength of the usual Japan Driers. Is specially commended for mixing with delicate colors, and striping. Is NOT intended for gilding.

**Black Enamel Leather Varnish,** \$3.00

For the enamel leather of carriages. Dries in twelve hours; is very elastic and durable. Use in dry weather or sunshine; remove all grease with turpentine.

**No. 1 Carriage Varnish,** \$3.00

This is a light colored, heavy bodied, durable Varnish. Covers striping well, and is made for use on bodies and carriage parts. Dries in twelve to fifteen hours.

**Coach Painters' Japan,** \$1.75

This is a very superior article for drying and binding colors. Will mix freely with oil, and can be depended upon as a safe and reliable Drier at all times.

Put up in barrels, half barrels, 5, 2, and 1 gallon cans, without extra charge.

# Moller's Cod Liver Oil

Gained the ONLY FIRST PRIZES at  
the Great Exhibitions of  
LONDON, PARIS, VIENNA, etc

It is now about nine years since we accepted the sole agency for North America for this article; we did so only after a very careful examination of the facts connected with its manufacture, as we had reason to believe that a large proportion of the Cod Liver Oil which is sold is prepared in so careless a manner as to render it unfit for use.

Immediately upon its introduction into this country it took front rank as a pure and strictly reliable article, and we feel warranted in claiming it to be *beyond question, the best and most reliable Cod Liver Oil in the world.*

From an overwhelming mass of Medical Evidence as to its superiority, the following Testimonials have been selected :

LOUIS A. SAYRE, M. D., New York, Professor of Orthopedic Surgery, says: "Moller, of Christiania, Norway, prepares an oil which is perfectly pure, and, in every respect, all that can be wished."

DR. J. MARION SIMS says: "For some years I had given up the use of Cod Liver Oil altogether; but since my attention was called by Dr. Sayre to Moller's Oil, I have prescribed it almost daily, and have every reason to be perfectly satisfied with it."

DE BESCHE, M. D., Physician in Ordinary to H. M. the King of Sweden and Norway, says: "I can unhesitatingly recommend PETER MOLLER'S Cod Liver Oil as, in my estimation, the very best ever prepared for medicinal purposes."

DR. RUDDOCK, M. D., L. R. C. P., M. R. C. S.: Extract from the Report on Cod Liver Oil in his 'Vade Mecum,' Part IV: "The oil we invariably recommend for its easy assimilation, agreeableness, and high nutritive value, is MOLLER'S Purest Norwegian Cod Liver Oil. We are glad to be able to give our emphatic recommendation to so pure a preparation."

ABBOTTS SMITH, M. D., M. R. C. P., late Physician to the North London Consumption Hospital, says:—"It is more easily assimilated, and is productive of more immediate benefit than the other kinds of oil are."

# The Druggists Circular

— AND —

## CHEMICAL GAZETTE.

THIS widely-known and popular publication is issued from 36 BEEKMAN STREET, NEW YORK, at the low price per annum, (including postage,) of ONE DOLLAR AND SIXTY CENTS.

The present year, (1878) is the twenty-second of its publication.

The quantity of Scientific matter, both professional and general, is large, and includes the whole sphere of Laboratory and Counter Pharmacy. All new Medicines, so soon as known, are fully noticed; their ascertained properties described and their pharmaceutical management, therapeutical uses, doses and modes of administration, are carefully reported.

THE DRUGGISTS CIRCULAR has been accustomed familiarly to discuss in each number some of the many practical *puzzles* and *difficulties* which beset the Apothecary in the prosecution of his daily business. This peculiar feature of the paper seems to be highly valued. Each day's mail brings to us from subscribers new problems for solution, or acknowledgments for services rendered. The *Druggists Circular* contains a monthly Review of the Drug Market, and a *Complete Price Current*, embracing nearly every medicinal article of a well-stocked drug store, with prices each month *carefully corrected* by one whose opportunity and pursuits fully fit him for the undertaking. It gives always as fair and rational an idea of market values as it is possible in any list of prices to attain.

THE DRUGGISTS CIRCULAR, were it only regarded as a Trade paper, affords unusual and great advantages and facilities to *purchasers*, on account of the extent to which Wholesale Dealers and Manufacturers have found it to their profit to use its pages for advertising their commodities.

L. V. NEWTON, M. D.,

PROPRIETOR.

We gladly recommend the Druggists Circular to our customers.

# The Manhattan Medicine Company,

No. 122 LIBERTY STREET, NEW YORK,

ARE SOLE PROPRIETORS of the following preparations, the right to manufacture which they have acquired by purchase from the former owners, and which they now prepare at their laboratory in New York, with great care, faithfully following the recipes as originally employed, and preserving, in every respect, the general style of labels, bottles, &c., first adopted.

Atwood's Physical Jaundice Bitters.	Charles London Cordial.
Dr. Roger's Syrup of Liverwort, Tar, and Canchalagua.	Blokrene.
Spalding's Cephalic Pills.	Mathew's Hair Dye.
" Throat Confections.	Phalon's Vitalia.
Toms' Russian Liniment.	" Hair Invigorator.
" Condition Powders.	" Hair Dye.
Dr. Johnson's Calisaya Bitters.	" Paphian Lotion.
Myer's Extract of Rock Rose.	" Snow White Cream.
	Morse's Luxurene.

## PHALON'S PERFUMES.

Night Blooming Cereus,	Wood Violet,
Flor de Mayo,	Paphian Bouquet,
White Rose,	" I Love You."

We would respectfully caution the public against imitations of Atwood's Bitters, and remind you that the genuine is put up in twelve sided bottles, with yellow label, and the name of Moses Atwood Georgetown, Mass., blown in the glass, and is prepared strictly in accordance with the formula used by Messrs. CARTER & SON.

The ATWOOD'S BITTERS, as made by us, are *full strength*, and *matured before bottling*, so that we guarantee them not to sour nor precipitate a heavy sediment at the bottom of the bottle. Dealers are cautioned against Bitters, purporting to be Atwood's, put up in plain round bottles, and offered at a reduced price. Cheap Bitters can only be made by a process of deterioration which, not only militates against their purity, but renders them liable to ferment and sour, if kept for any length of time, especially in hot weather.

ROGER'S SYRUP OF LIVERWORT AND TAR is too well known to the trade to necessitate any description of its merits in this place. It is the best COUGH MEDICINE ever prepared; and is put up by us exactly in the same manner as it was by Dr. Rogers thirty years ago. Its efficacy has been attested to by hundreds who have used it, many of whom had been considered past all cure before making a trial of it.

Price Lists sent on application. Favorable terms to Wholesale Houses. A liberal supply of Show Cards and other advertising matter furnished with every order. Our "MANHATTAN COOK BOOK," which contains some of the best cooking receipts ever published, is in very great demand wherever it has been sent.

Respectfully,

MANHATTAN MEDICINE CO.

# Tooth Ache! Jumping Tooth Ache!

## NERVOUS TOOTH ACHE!

Sleepless Nights, Weeks of Agonizing Torture,

Are all useless expenditures of nervous excitement since the introduction  
And Use of Davidson's Instant Tooth-Ache Cure.

[Registered.]

Competition defied! The world Challenged for the  
production of a better Article.

It causes no pain; cures instantly; at touch; purifies the breath; works  
like a charm; was never known to fail when used as directed.

### IN USE ELEVEN YEARS.

The advantage which Davidson's "Instant" Tooth-Ache Cure has over  
other preparations for the same purpose, may be summarized as follows:

- 1st. It is neatly put up in strong bottles, not easily broken.
- 2nd. It is in *Jelly* form, and is not liable to *loss* by upsetting.
- 3d. It is more easily introduced into the cavity of a decayed tooth, requiring no cotton batting.
- 4th. It takes less of it to effect a cure.
- 5th. It goes, at touch, directly to the cause of the pain.
- 6th. It removes the cause by closing the exposed nerve from the air.
- 7th. It does not stupefy or paralyze like preparations of Opium, Chloroform, Ether, and Aconite.
- 8th. It embodies the only remedies that have the power to reach the origin of Tooth-Ache misery.
- 9th. Its power to cure, and the ease with which it does it, is the astonishment of all who resort to its use.
- 10th. It is the only *Scientifically* compounded preparation that will fill the bill as its name indicates, and is in point of fact, as well as in name, an "Instant Tooth-Ache Cure."

## GUILD'S GREEN MOUNTAIN **ASTHMA CURE.**

---

**A**N ARTICLE of unrivalled prophylactic and therapeutic merit, prepared in accordance with the *ONLY RATIONAL MODE OF CURE*, specifically, for SPASMODIC ASTHMA, by Dr. J. H. GUILD, graduate of New York Medical College and New York Chemical Laboratory, late practitioner in Bellevue and New York Charity Hospital; a physician of recognized ability, and of distinguished eminence in the medical profession.

No preparation for the *PERMANENT CURE* of Asthma has hitherto been known, and none, for its professed cure, has ever met with so *GREAT a measure of success* in the brief period of time it has been before the public, as

**GUILD'S GREEN MOUNTAIN ASTHMA CURE.**

See Dr. Guild's pamphlet containing over **Three Hundred and Fifty Genuine Certificates of Cures.**

As an inducement for dealers to sell this most excellent remedy, a margin of over *one hundred per cent.* profit is afforded them, as per following scale of prices:

THE CELEBRATED  
**BRANDON PAINTS,**  
 MANUFACTURED BY THE  
 BRANDON KAOLIN AND PAINT CO.,  
 BRANDON, VERMONT,

Have been thoroughly tested and proved, and are presented with great confidence to the public. They are believed to be the best Paints in the market. These Paints are composed of Alumina, Protoxide and Peroxide of Iron, and Deutoxide of Manganese, in variable proportions, constituting the varieties offered for sale. The BRANDON PAINTS possess in an eminent degree *all the qualities* requisite for the protection of Wood and Iron, and experience proves their superiority on Iron, Tin, Brick, Cloths, &c.—They are excellent substitutes for Red Lead or Brown Zinc, to which they are far superior either above or under water. They have good body, cover well, and are *more durable and much cheaper* than White Lead or any Paint having White Lead or Zinc for a basis. These Paints are so fine they require no grinding for use. As they contain a large per cent. of Manganese, enabling them to dry readily, they are far preferable to foreign ochres. Sold by Druggists and Paint Dealers generally.

# A Word to Clergymen.

**F**RIEND, STOP THAT COUGH! Do not NEGLECT a Common Cold, even for a day. It may end in Consumption and death. Rev. N. H. DOWNS' ELIXIR has cured thousands, both old and young; and it will cure you, if taken freely and in season. This ELIXIR has been before the American people FORTY-SIX YEARS, and has never failed to give relief to all who have used it. It has won its way by *actual service*, until it has become a household friend in thousands of our best families. Regular physicians use and recommend it. Clergymen and all public speakers are its best patrons. Railroad employees, much exposed to colds, coughs, etc., should always use it. Farmers, Lawyers, Merchants, and everybody, old and young, speak highly in its praise.

## A REMEDY THAT NEVER FAILS.

Henry & Johnson's Arnica and Oil Liniment is an external remedy for man or beast, for curing Wounds, Sprains, Strains, Sores, Cuts, Bruises, Burns, and Ulcers of every kind, including Skin Diseases generally; and while its application is harmless and never painful, its effects are most wonderful. As a FAMILY LINIMENT it meets the wants of every household. Warranted to satisfy all who use it.

**B**XATER'S MANDRAKE BITTERS are just the Medicine to use during the heated term. They rectify torpidity of the Liver, give tone to the Stomach; they act, without griping, upon the bowels; they remove bile from the blood; they purify, regulate and invigorate the body, thereby preventing many diseases incident to hot summer weather. The public, the medical profession, and the press, have borne ample testimony to the sterling qualities of BAXTER'S MANDRAKE BITTERS made by HENRY, JOHNSON & LORD, Burlington, Vt., who are the only proprietors of the genuine. Price 25 cents per bottle.

**A Vegetable Remedy**

FOR ALL FORMS OF

**PILES AND KIDNEY COMPLAINTS,  
Lumbago, or Acute Rheumatism,  
GRAVEL, CONSTIPATION of the BOWELS, &c.**

**T**HE KIDNEY WORT is especially effective for the cure of all forms of PILES and KIDNEY COMPLAINTS, Lumbago or Acute Rheumatism, Gravel, Diabetes, stoppage or unnatural or unhealthy flow of Water, Constipation or Inflammation of the Bowels. It is reasonable to infer that a medical compound that removes such chronic diseases must be invaluable for cleansing the system and purifying the blood, which is a necessary condition to acquire tone and vigor of health. If unwell, take enough to act as a cathartic, and improvement will soon be manifest. Use the *Kidney Wort* when the first symptoms of disorder appear, and much sickness and medical attendance may be saved. No change in the diet is required.

# REFINED GUM CATECHU.

IN PACKAGES.

**W**E DESIRE TO CALL YOUR ATTENTION TO THE new and desirable form in which we offer this article.

By an improved process the Catechu is freed from the many impurities so abundant in the crude article, and it is thereby made much stronger and better for all uses. It enables you to supply a better article to the consumer, and at the same time save the loss from waste and shrinkage of weight, which is always large when Catechu is handled in bulk. It will save a great deal of time and temper, which are quite sure to be lost when retailing the crude article.

# UNIVERSITY OF VERMONT.

## MEDICAL DEPARTMENT. BURLINGTON, VT.

TWENTY-SIXTH SESSION, 1879.

### FACULTY OF MEDICINE:

- MATTHEW HENRY BUCKHAM, A. M., D. D., *Burlington, Vt.*, President.
- SAMUEL WHITE THAYER, M. D., LL. D., *Burlington, Vt.*, Emeritus Professor of General and Special Anatomy. Consulting Surgeon to Mary Fletcher Hospital.
- WALTER CARPENTER, M. D., *Burlington, Vt.*, Professor of the Theory and Practice of Medicine, Physician-in-Chief to Mary Fletcher Hospital.
- JOHN ORDRONAU, M. D., LL. D., *New York City*, Emeritus Professor of Medical Jurisprudence.
- WILLIAM DARLING, A. M., M. D., F. R. C. S., *New York City*, Professor of General and Special Anatomy.
- A. F. A. KING, M. D., *Washington, D. C.*, Professor of Obstetrics and the Diseases of Women. Consulting Physician to Mary Fletcher Hosp'l.
- HENRY D. HOLTON, M. D., *Brattleboro, Vt.*, Professor of Materia Medica and General Pathology. Consulting Surgeon to Mary Fletcher Hospital.
- A. P. GRINNELL, M. D., *Burlington, Vt.*, Professor of Physiology and Microscopic Anatomy. Attending Physician to Mary Fletcher Hospital.
- JAMES L. LITTLE, M. D., *New York City*, Professor of the Principles and Practice of Surgery, Surgeon-in-Chief to Mary Fletcher Hospital.
- R. A. WITTHAC'S, *N. Y. City*, Professor of Chemistry and Toxicology.

### PROFESSORS OF SPECIAL SUBJECTS.

- WILLIAM A. HAMMOND, M. D., *New York City*, Professor of Diseases of the Mind and Nervous System.
- ROBERT W. TAYLOR, M. D., *New York City*, Professor of Diseases of the Skin.
- GEORGE M. GAFLAND, M. D., *Boston, Mass.*, Professor of Diseases of the Heart and Lungs.
- LEROY M. BINGHAM, M. D., *Burlington, Vt.*, Demonstrator of Anatomy, Attending Physician to Mary Fletcher Hospital.
- A. T. WOODWARD, M. D., *Brandon, Vt.*, Professor of the Surgical Diseases of Women, Consulting Physician to Mary Fletcher Hospital.
- STEPHEN M. ROBERTS, M. D., *New York City*, Professor of Diseases of Children.
- D. B. ST. JOHN ROOSA, A. M., M. D., *New York City*, Professor of Diseases of the Eye and Ear.

**HOSPITAL ADVANTAGES.**—The Mary Fletcher Hospital, now in progress of erection, will be ready to receive patients before the next regular session.

Clinical instruction in Medicine, Obstetrics and Surgery will be given during the regular course of lectures by the Professors of the Medical Department of the University.

THE REGULAR WINTER SESSION will commence on the first Thursday of March, 1879, and continue sixteen weeks. This course will consist of from five to six Lectures daily, in the various departments of Medicine and Surgery. In order to render the course of instruction still more complete, six new Professorships on special subjects have been created by the Faculty, which will afford the student a rare opportunity for gaining information from gentlemen well known as recognized authorities in their particular departments on subjects of great practical interest. These Lectures will be delivered during the regular session.

Material for dissection will be furnished at cost.

Good board can be obtained at reasonable rates. For further particulars and circular, giving Fees, &c., apply to the Secretary.

Prof. A. P. GRINNELL, M. D., Burlington, Vt.
