"A," in the foregoing list means ADVANCED; "D," DECLINED.

 **AN ALMOST FULL LINE OF MERCK'S CHEMICALS IS KEPT IN STOCK** by every well-managed jobbing house in the United States. Pharmacists will find no difficulty in getting MERCK'S brand from their regular supply house, whenever specified. If, however, difficulty should be experienced in thus procuring any of MERCK'S chemicals, as listed above, prompt relief will be had by notifying

**MERCK & CO.**

---

## ... THE SECRET ...

IT IS on the shelves, about the dispensing counter that the knowledge, the care, the conscientiousness, and the business capacity of the pharmacist are most clearly exhibited. The little labels on the bottles tell a weighty story; they either commend the druggist for careful selection of the best that can be had, or they accuse him of indifference to the quality of the medicines he dispenses.

### A Merck Label

is universally recognized as a guarantee for purity, reliability, and general excellence. Many thousand physicians who specify **MERCK'S** products in prescriptions, and the thousands of pharmacists who, in ordering, designate **MERCK'S**, will verify this statement.

A pharmacist who carries stock bearing this guarantee, commands confidence and respect. The more **MERCK** labels are found in the prescription department of a pharmacy, the higher its standing, the better its service. *Medical men appreciate this fact.*

## Merck's Chemicals

are obtainable through any wholesale drug house in the United States, in original, unbroken packages of any desired size, and at prices no higher than those charged for other labels.
