			PURIFIED CACAO BUTTER (Oil of Theo- broma, U. S. P.), for Suppositories, per lb.	70

We have constantly in stock —

E. R. SQUIBB'S PREPARATIONS.

ROSENGARTEN & SONS' CHEMICALS.

} Comprising their entire Lists.

ENGLISH CHEMICALS FROM T. MORSON & SON.

BULLOCK AND CRENSHAW'S SUGAR-COATED PILLS.

KEASBEY AND MATTISON'S GRANULAR EFFERVESCENT PREPARATIONS.

VALENTINE'S MEAT JUICE.

We would call especial attention to the following articles in the within list:—

BURNETT'S PURE COD LIVER OIL.

This oil is prepared from the fresh, healthy liver of the Cod, in the same careful manner and of the same superior quality as when first introduced to the medical profession, thirty years ago.

Dr. J. C. B. Williams, Consulting Physician to the Hospital for Consumption, at Brompton, England, after an experience of over forty years, during which time he has treated more than 20,000 cases of Consumption, says, "The great remedy, more essential and more effectual than any other, is COD LIVER OIL; and I have no hesitation in stating my conviction that this agent has done more for the consumptive than all other means put together; and so far is this remedy from 'having had its day and gone out of fashion,' that, in my experience, its usefulness and efficacy have gone on increasing in proportion to the greater facilities for obtaining it in a pure state."

MELLIN'S EXTRACT FOR PREPARING LIEBIG'S FOOD.

Not Farinaceous.

By means of this Extract the genuine Liebig's Food can be prepared by mothers or nurses for their infants more easily and speedily than common milk pap.

This food is intended for perfectly healthy as well as ailing children, and it is a misfortune that it is often tried as a last resource instead of being given as soon as a mother becomes aware of a deficiency of breast milk. In all cases where a child has been fed entirely with this food, its good results have been marvellous.

KENT'S METALLIC NIPPLE SHIELD AND CAOUT-CHOUX TEAT.

"The only perfect mechanical substitute adapted to all cases of excoriated and retracted nipples."

COMPRESSED PILLS,

Prepared extemporaneously. We have provided the necessary apparatus for preparing Compressed Pills upon prescription. Physicians who do not wish to prescribe the Compressed Pills as found in the market ready-made, and Pharmacists who have prescriptions for Compressed Pills not on the lists, can have them compressed as readily as they can be prepared by the old method.

"CACHETS DE PAIN," OR WAFERS, for Administering Powders.

This elegant mode of rendering medicines tasteless has become very popular. We can supply the Wafers, either empty or filled, as may be desired.

SUPPOSITORIES.

Plain and Medicated, Rectal, Vaginal, and Urethral. We keep more than fifty kinds ready prepared. We also prepare them extemporaneously for the Physician or the Pharmacist. For those Pharmacists who prepare their own Suppositories we have the best English Suppository Moulds, and the best quality Cacao Butter. See page 3.

FLUID EXTRACT OF WILD CHERRY, U. S. P. 1860.

Wild Cherry Bark is represented by this Fluid Extract, probably more perfectly than by any other preparation.

FLUID EXTRACT OF ERGOT.

A reliable preparation.

FLUID EXTRACT OF CALENDULA (Marigold Flowers).

Used as a local remedy for sprains and bruises and in surgical cases for the prevention of suppuration. Used internally it is slightly stimulant and diaphoretic.

FLUID EXTRACT OF CHESTNUT LEAVES.

The new remedy for Whooping Cough.

FLUID EXTRACT OF RICINUS COMMUNIS LEAVES

Has been used as a Galactagogue.

FLUID EXTRACT of RHAMNUS FRANGULA and ELIXIR of RHAMNUS FRANGULA or Buckthorn Bark.

Rhamnus Frangula has long been used in Germany as a gentle laxative. It has more recently come into notice in England and in this country.

A distinguished Pharmacist of England says: "The greater part of my occupation being sedentary, it has induced a constant constipation, which is extremely hurtful in its effects. Now, though I am extremely opposed to anything like testimonials, I think we must distinguish between testimonials and testimony, and that I am entitled to bring forward the results of my own experience with regard to the use of this drug. I thought it would be well to try the effect of this very simple remedy, and the result was truly marvellous, though I am afraid of using exaggerated terms. It answered in every respect the purpose intended; it appears to be an invigorating stimulant to the bowels, and not an irritant.

The Elixir of Rhamnus Frangula will be found an excellent laxative for children, on account of its pleasant taste and gentle action, and the small dose required.

TINCTURE OF OPIUM and DEODORIZED TINCTURE OF OPIUM.

These Tinctures of Opium are prepared from the best Yeri Opium, they are made by assay and adjusted to the strength of four grains of Morphia in each fluid ounce.

The importance of having preparations of Opium of a uniform strength must be apparent to every careful physician and pharmacist.

COMPOUND TINCTURE OF IPECAC.

A fluid form of Dover's Powder. Ten minims of this tincture represent one grain of ipecac and one grain of opium; that is, one minim of the tincture represents one grain of Dover's Powder. It will be found useful by those physicians who carry pocket cases of medicines for immediate use at the bedside.

BENZOINATED ZINC OINTMENT.

Made by the older process of digestion; considered by those physicians who are most familiar with its use as superior to that made from the Tincture.

CARBONATE of AMMONIUM RESUBLIMED.

For preparing Liquor Ammoniae Acetatis and for other nice pharmaceutical uses.

CHLORINE WATER.

The great prevalence of Throat diseases has caused a demand for this article, which we are enabled to supply.

DAMIANA.

We prepare the Tincture and Fluid Extract of this herb; it has recently been brought to notice as an aphrodisiac.

GRINDELIA ROBUSTA

Has been used as a remedy in Asthma, Rose Cold and Hay Fever; also for eruptions caused by Rhus Toxicodendron or Poison Oak. We prepare the Fluid Extract and the Tincture.

GUARANA (Paullinia).

This remedy has had remarkable success in the cure of Sick Headache; it has also been used in Rheumatism and in Diarrhoea. We supply the article in powder in one ounce and four ounce bottles. We have also the ELIXIR, which is a very agreeable form for the administration of this medicine; the Fluid Extract, one minim of which represents one grain of powdered Guarana; the Solid Extract for preparing pills, and the Tincture.

We are supplied with all the newer remedies, among which may be mentioned Jaborandi, Boldo, Gurjun Balsam, Oil of Betula (Birch).
