

A Few Remarks From Other People.

Stafford Water is Radio Active.

WHEREVER THERE IS A NEED for **Stafford Water** and it is used Judiciously, an expression of gratitude and encouragement is always forthcoming.

MANY ATTEMPTS have been made to explain scientifically the reasons for the beneficial results obtained. The following is a part of a report made by Froehling & Robertson, Chemists, of Richmond, Va., who made an exhaustive study of the water and found it to be Radio Active.

The Radio Activity of Mineral Water has lately thrown some light on the mineral waters which formerly could not be accounted for and we believe that it may help to explain some of the beneficial effect obtained from Stafford Water.

It has been shown that Radio Emmanations are very effective in Gout, Rheumatism, Sclerosis of the Arteries, and that the use of Radio Active waters either by drinking or bathing, has a strong tendency to increase the activity of the kidneys and bladder. This has perhaps been no uncertain factor in producing the many cures of Nephritis and other Kidney troubles credited to the Stafford Mineral Water.

THE FOLLOWING STATEMENTS have been taken at random from the hundreds which have sifted into our files from various parts of the country, and the report from Froehling & Robertson, at least, partly explains why results were obtained that warranted these remarks.

WE HAVE PRINTED MATTER showing hundreds of letters from users of **Stafford Water** and copies will be mailed to anyone by addressing
