

Gabriel

SEP 14 1972

Dear Mordecai

Can you remember when and how you first heard of Avery, around Columbia? I have a note c. 1945 that Harriett Taylor had pointed it out to me. Was she the main vehicle to the dept., or had she been involved with it by other faculty?

Your father called me briefly while I was in Rehoboth in July. Unfortunately I was leaving the next day and could not return his call. I could not judge his health; his voice was strained but certainly a clear mind as could be.

I have had no news of you or Shoshana for so many years! Perhaps you do not know even that I remarried in 1968. Margaret is a pediatrician, turning now to psychiatry. We have her 8-year old, David, with us.

Thinking back to 1945 perhaps inevitably focuses my thoughts back to personal as well as scientific relationships. Your patience with me while you were finishing your graduate work was certainly a helpful inspiration.

L'Shana Tova to you and Elchi,

Yours,  
Jack.
