

November 21, 1969

Dr. W. M. Stanley
Virus Laboratory
University of California at Berkeley
Berkeley, California 94720

Dear Wendell:

I am enclosing a xerox copy of the letter of Fess Avery to his brother. I don't think that Colin or I have ever done just the kind of thing you mention, although we did prepare something together for the A.C.S. symposium in San Francisco in 1968, and I am enclosing also a copy of this. One of the things Colin is doing at present is to work on a book that will cover the historical background. It's a difficult matter to project oneself back 25-30 years, and he's attempting to go through all of the old laboratory notes for orientation.

With best regards,

Sincerely yours,

Maclyn McCarty, M. D.
