17 March 1976

Dear Colleagues,

Here is the edited copy of the report of the Nomenclature Committee. I have taken the liberty to delete the Table (which contains examples which have not been mapped) because the same information is for the most part contained in the "Table of Phenotypes for which Information on Chromosomal Assignment is Available." I also enclose said Table. Do you approve of handling it this way? Do you have specific suggestions for individual items in the Table. As ever,

To: Nomenclature  
Committee  
Associate editors
