Department of Preventive Medicine

Dear Dr. Lederberg,

Thank you for ^{your} interest in our work on drug-resistance transfer among plasmodia.

I am forwarding herewith the two papers on this subject. Having read and admired your writings outside the field of genetics, and the humanistic message they convey, I take the liberty of including a few short essays which are on the borderline of medicine and literature, with the hope that you will like them.

YOELI

Yours sincerely
Meir Yoeli

I assume I sent a reprint (+ request) citing Browning. 11/72
