Memo from
JOSHUA LEDERBERG

To: R Young

The most interesting works
on philosophy - inference in
biology - in recent years are:

Michael Ruse (Oxford, Ont.)

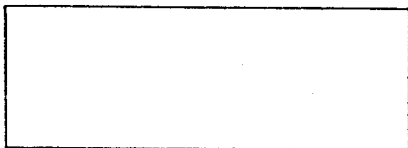

"Phil. of Biology". Hutchinson
(London)

Smart, J.J.C. "Phil. + Scientific
(Adelaide)
Realism". Routledge + Kegan Paul
- see attached; criticized by Ruse

Gould, "Ascent of life"

An excellent non-technical analysis
of inference about evolution

Do you know Ghiselin, M.
(Berkeley) - "Triumph of the
Darwinian Method" - U. Cal 1969.

PROFESSOR JOSHUA LEDERBERG
Department of Genetics
School of Medicine
Stanford University
Stanford, California 94305
