

Memo from  
JOSHUA LEDERBERG

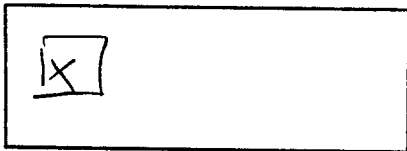

To: A Zeffaroni.  
ALZA.

JUL 6 1971

O<sub>2</sub>-transport in contact lenses.

Perhaps the hydrophilic plastics  
totally solve this problem; if  
not, consider the incorporation  
of O<sub>2</sub>-transfer complexes in  
the polymers. (We had some  
discussion ages ago about  
"synthetic bloods".)

Josh.
