B

Dear Beets:

We are looking forward with enthusiasm to your visit and lecture, and hope that Marion will be able to come along too. Will make final arrangements when you arrive -

I hope that while you're here you'd be willing and could find time to give an informal discussion (or seminar) of the recent advances in Neurophysiology to our gang?

With our best to Marion, and hoping you won't be ^{too} busy to save lots of time for us and the Bonners!

Yours
Ed
