

Personal Memo from
JOSHUA LEDERBERG

Dr. John #11one

JAN 30 1986

Dear Johnnie

History of (birdlike) genetics.

Bart Childs has shared pp 291-296 of your writing with me

I thought you'd be interested in my draft on Ed Tatum. I've been looking closely at the connection of Parrod and the Neurospora work. It's slightly more complex than has been given out.

Could you let me see pp. 296 of your treatment of Neurospora?

It's been a while since we've seen Betty + yourself.

all the best,

John
