Dr. Joshua Lederberg
President
Rockefeller University
New York, New York 10021

Dear Joshua;

Thanks for your 75-76 "historic" note on multi-processor/hydroids. As usual long-term vision hits good people at about the same time.

Meanwhile I have just heard that at Osaka they have built a 40-processor dataflow machine. I wish we could speed up the formation of a special research program in this area funded by the DOD.

With best regards,

Michael L. Dertouzos

MLD/jc
