

DEC 29 1980

② Per Hospital for studies on workers  
exposed to chemicals.

We have had some brief discussion of this  
concept.

~~filed~~ I've also brought it up with Carter  
and with a number of people in industry  
and I believe it would have a lot of sup-  
port.

It may be the only way to get data  
on metabolic disposition of various  
(toxic) compounds in the human.
