

February 4, 1979

Dear Marguerite + Josh,

I want to thank both of you for the great pleasure of having been included among your guests at that memorable anniversary celebration on Friday. The proceedings at the University Seminar were most impressive both for historical and personal-psychological reasons. As one who has had the good fortune of witnessing the events from their to us from the sidelines, I was quite fascinated by the implications of the development of the work on the human level. I suppose the proceedings were taped. For their own sake, they will no doubt be a most significant historical document. The dinner at your house

lived up to the occasion in its elegance.
I was delighted to see your two children
both of whom helped to lend the evening
the personal touch which I appreciate partic-
ularly. - It was a truly imaginative
idea to hold this meeting, & I hope this
may be the first of other similar occasions
putting relatively recent scientific advances
into their historical perspectives.

I thank you once more for your
hospitality & hope to see you again soon.

With warmest wishes to the four of you,

Salvatore
