Dr. Joshua Lederberg
President
Rockefeller University
New York, N.Y. 10021

Dear Josh:

? NS De
nomini }

The reprint you are asking for is an abbreviation of the full German version. This was the festival presentation at the occasion of the 100st anniversary of the "Union of Chemical Industries in Germany", held in Berlin in October 1977. I add here the German version^x and also the English overbridged version.

It is with great satisfaction that we learned about your nomination as President of the Rockefeller University. I wish you all the best for this difficult job with the image of the famous old Rockefeller Institute.

My wife, Ursula, and I will be in New York (I as a member of the Advisory Board of the Sloan-Kettering Institute), and Lew Thomas suggested that we may have a double room in the Abbey Aldrich guest house. If so, I would be hopeful to meet you in New York while being with the Sloan-Kettering people: October 19/20 are the official dates, but we intend to stay (perhaps) for about 2 weeks in order to perform some experiments on dogs having lymphomas, treating them with endotoxin and combinations of endotoxin and certain drugs that reduce untoward side effects.

Our experiments with the hybrids are progressing. The key point focusses now on the question of colonization of the life (vaccine) bacteria in the gut. Whether the ability to colonize will introduce pathogenicity again, is the main question. At present it looks still promising.

With warm regards, also from Ursula,

Yours,

Otto
