Levine, P.

Wed July 23 80

Dear Josh:

Am now in Paris for the Inter. Congress Immunology, enjoying contacts with colleagues and attending some highly stimulating talks. This is a unique and a 1000 room hotel which is a big city in itself.

Rod Nichols knows about a possible, easy solution for laboratory space as suggested by Mr. Bill McLaughlin head of the grants & contracts at MSKICC. He knows that since 1946 I have been in academic research at Ortho and my recent papers bear the subheading "from MSKICC and Ortho Research Foundation". Bill McL suggested that if Ortho were to grant me the space required for my post-doc + technician, MSKI would compensate Ortho. Such tasks are now pending. I will of course maintain my offices at MSKI, hopefully at a larger office. Should Ortho + MSKI reach an agreement, I would like to discuss it with Paul Marks for his approval.

By this time Rod Nichols has probably discussed this matter with Bill McLaughlin

(over)

who has shown great enthusiasm for my research program and has been most helpful.

Thus, I am now more at peace with myself and sufficiently relaxed to write the paper on antibody induced abortion and its possible bearing on potential immunotherapy of adenocarcinoma.

I plan to visit Amsterdam after the Congress and am scheduled to return to N.Y. on Tuesday July 29.

Kindest regards

Yours
D.D.
