AUG 3 1959

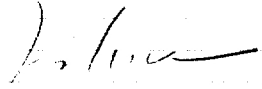

Dear Joe--

Does Bristol have a product in this field--  
I mean radiocontrast agents? (Or maybe later  
density-fractionation solutes). \*

By coincidence, the latest Ann NYAS is on this  
subject.

Thanks for the reprints.

Harry Rubin told me of his visit. He's an  
able fellow.

(a tetraiodo-benzoyl or-phthaloyl penicillin  
might not be altogether preposterous: take ad-  
vantage of the low toxicity and rapid excretion  
of the penicillins)

Have any penicillins been made where R- is  
an amino acid?

cc: letter to Testa.
