

Personal memo from
JOSHUA LEDERBERG

Dr. Stephen Edelbaum
UCLA.

Dear Dr. Edelbaum -

MAY 19 1993

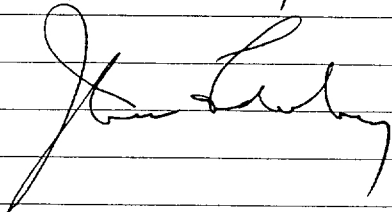

- Argues -

I am very grateful to you for your critical and always' perspective on 'Rogers' work.

I had extensive correspondence with him, but to the best of my recollection did not meet him just once. So I have no personal basis to add to your assessments. He died a few years ago; I've urged his widow to deposit his papers in extens with the APS in Philadelphia.

To try to get a more detailed clinical account of the treated arginineemic children, I tried writing to Terheggs but mail was returned. Whatever else is said, the clinical group bears whatever responsibility may attach to the treatment decisions.

Sincerely

THE ROCKEFELLER UNIVERSITY

NEW YORK 10021-6399
