Dr. Joshua Lederberg
Dept. of Genetics
Stanford University School
of Medicine
Stanford Medical Center
Palo Alto, California 94394

Dear Dr. Lederberg:

Just a note to tell you that they have finally gotten the cultures going. Ernest Chu who is quite expert in this area and whose lab is next to mine is going over next month for some meetings and is going to stop by Antwerp to give them help if they need it and send or bring the cell lines back with him.

Nothing has happened yet but it will be a few more weeks before we can expect anything judging from our animal work. Should we not see anything we probably should reintroduce the virus as because of the nature of things we gave a very conservative dose -- less than we would give a mouse or a rabbit.

Best regards,

Sincerely yours,

A handwritten signature in cursive script, appearing to read "Stanfield Rogers".
