

Dr. Schmeyer

JUN - 4 1982

Thank you
for your letter of April 20.
I continue to follow up your
suggestions.

I have been waiting for my
"annual report" to come back from
the press, so as to send it to you.

On the now-measurable complexity
of living systems, at the foundation
of rational health science, I will
be writing further.

Sincerely,

John Leuberg
