JOSHUA LEDERBERG

NOV 24 1976

Thank you very much for letting me see the correspondence. It was fun to be reminded again of your seminal role in setting up SACS properly (not that I needed reminding!)

Well at least there are some strong hints; and tie points of time + place.

Henry Kaplan was useful only in directing me to Fred Termon who chaired the search; and just might be the one to have saved some files.

Yves.

Yves.
