some hypotheses falsified:

in fact:

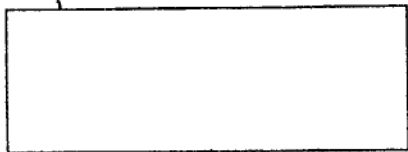

Van Niel

Haagen-Smit

encountered Ed quite independently
of one another, and of Beadle's
recruitment of Ed from Kögl's
lab!

I am learning something of
the academic politics of Stanford
in 1944. CV Taylor + Tressider
and the Dept were in

a multiway ring! My
suspicions (recollections?) of Ed
having been nudged out in 1945 are
verified by Van Niel!
