JOSHUA LEDERBERG

NOV 10 1976

P.S. - re Tatum memoir

Further to my note of a few days ago.

As I now recall that you met Ed at Utrecht, may I focus my questions to you on that interval (1936-37).

Do you recall

- 1) What Ed worked on at that time? (I have not found any publications)
- 2) How he happened to choose that lab?
- 3) What you can recall of his intellectual outlook at that time?
- 4) How he was recruited from there to Stanford?

Is there an "intimate history" of biotin in print?

Cordially,

JL
