June 22 1993

Dear Joshua,

Thank you very much for  
your note about my article on chemical mutagens etc.  
We were interested to learn, from Lette's 1<sup>st</sup> Nature  
paper reporting that allyl isothiocyanate was mutagenic,  
that you had guessed that mustard was also  
mutagenic. Of course Lette could not report that  
during the war because of the military restrictions.  
Thanks also for your reprints about Muller etc. I  
read them all with much interest.

With best wishes

Geoffrey
