Hadley - "Dissonance"

Thank you for yms of 10/26, re  
system of growth rates.

A propos Hadley - no I don't  
think we've discussed it. But I've  
always thought his ideas of  
cytogeny etc compounded the  
problem! As did W. Brown.

Have we been smothered?

I've re-read Ede + Wright (U. Wis.!)  
many times, and am ~~was~~ more  
impressed by their clarity.

L. J. Ede was among the very few  
geneticists who took any note of  
bacteria at all, so soon after  
the 1900 rediscovery of Mendel, and  
Johannsen 1909.
