David → Beadle + Tatum

Thank you, Beadle! Your letter
is as judicious and critical as could
be. And I agree with all you
say about David.

Don't pass Tatum by so quickly.

Whether genes are proteins or DNA
is a different issue. And "enzyme"
has to be taken not too strictly.

Beadle himself talked of genes having
both auto and hetero-catalytic
functions.

Did I send this very early paper
by Haldane?

J.
