

Personal memo from
JOSHUA LEDERBERG

Prof Dan Hartl
2/4/89

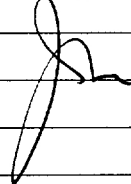

Dear Dan

Gene/enzyme evolution

Thank you for the preprint. Jim
had told me you had a perspective
coming. (See Maule for me of mine).

Yes I have a sentimental attachment
to "lac" and have been interested in
the issues you raise for a long time.
(See encl.)

Sincerely,

*at least speculatively; I never found
a duplicate "lac⁺", but plenty of suppress-
ors of lac, -- no good methods then
to verify ~~that~~ a distinctive gene product.
