

Prof. Hymowitz ↓  
12/10/89

Kennitz

I see you're casting him before  
sunrise; But in all seriousness  
I'm sure he'd have been delighted.  
Thank you - and be sure your  
letter will be in our archives.

What do you imagine is the  
"biological function" of the inhibitor?

Sincerely,

Ken Taylor

P.S. Can you give me a bit  
more bibliographic history on  
your development? Is any of the  
controversy in print?
