

Memo/Reply From  
**JOSHUA LEDERBERG**

TO: Dr. Jozsef Molnar

Dear Dr. Molnar

JAN - 3 1991

Your works on plasmid  
~~and~~ by phenothiazines have  
interested me on several counts.

The most recent known to  
me was in 1980.

Do you know of further inquiry  
about DNA-binding of phenothiazine?  
Discussion of mutagenic adversity  
from use of these drugs?

Do you confirm that methylene  
blue potentiates the action? What  
does methylene blue do alone?

Adrien Albert ("Selective Toxicity")  
talked about therapeutic interference  
but I never understood that.

Sincerely,  
Joshua Lederberg
