

Personal memo from
JOSHUA LEDERBERG

Dr. A. W. Pappenheimer
Harvard

FEB - 3 1988

Greetings!

Writing a memoir on Ed Tatum,
I'm trying to certify the provenience
of the concept that auxotrophy is
a loss of synthetic competence.

Woff tells me he was unaware of
Mueller's work at the time (~1936)
but that he had enumerated it very
clearly.

Your memoir on Mueller affirms
the point.

Could you save me some digging
by pointing to the source reference,
presumably in the 1930's? It's
clear enough in his 1940 review
(and I remember that well enough).

Best wishes
