

Personal memo from
JOSHUA LEDERBERG

David Talman, M.D.

JUN 15 1988

Century of Progress.

I really enjoyed the
total sweep of your address.

Re Symmett - I do not
often see reference to Montclair
NJ - but I was born there.

One small point: Griffith

in 1928 transformed pneumo-
cocci with killed cells. In 1944

Avery et al. showed that the relevant
substance was DNA.

all best wishes,

p276
