Dear Josh.

I was very pleased and much interested by your recent correspondence which I received by mail, since I have changed, some time ago, my e-mail. My new e-mail is:

bussardpages@wanadoo.fr

You can use also my fax, which could be convenient

(33) 04 93 32 74 00

I understand that, unlike most immunologists, you do not, ^{except,} once and for all, any instructionist aspect in the immune response, though you consider it most unlikely.

This comes from the fact that you are (as I am) still interested in the Epistemological aspect of Immunology.

Your rewriting of your 1989 Science Paper is a model of clarity and concision, I wish I could have written it.

I am writing a longer and clearer paper about the anomaly of prions ⁱⁿ ~~for~~ Mol. Biol in general. Trying to use prions effect in *Saccharomyces* & *Podospora* to avoid all the clinical "mismatch" in BSE.

Have you read the last book of Th. Kuhn: "The road since Structures" The University of Chicago Press (2.000 Fascinating)

Yours as ever
Alain
