

Personal memo from
JOSHUA LEDERBERG

Malcolm Wiener ✓
May 3 '97

C^{14} dating

Dear Malcolm -

Of course, you have brought up,
many questions of physiology -
I don't know if they are comprehensively
addressed in any convenient source.

E.G. In a forest setting, how much
of the C^{14} entering the tree might
be 50-100 years old (or more) from
the forest floor? That should fluctuate
by season. I haven't even thought
of roots vs. stomata.

Have you a fun morning,

Joshua
