

# BIOLOGICAL ABSTRACTS

UNIVERSITY OF PENNSYLVANIA • 3815 WALNUT STREET • PHILADELPHIA 4, PENNSYLVANIA

Dec. 2, 1957

Dr. Joshua Lederberg  
Genetics Bldg.  
University of Wisconsin  
Madison 6, Wisconsin

Dear Joshua,

I'm awfully sorry you can't accept, but I do understand. You have lots of irons in the fire. Could you suggest a suitable colleague, someone active in the field of bacterial genetics, whom we might invite to be our volunteer Section Editor? There are rarely more than a dozen papers a month in this section on the Genetics of Bacteria and Viruses, but it is an important one.

Australia! Transformation and transduction are taking you far indeed. Send me a reprint now and then, so that I can keep up with the news.

Yours,

*Hilda*  
Hilda Vilkomerson

P.S. I have arranged to do most of my work at my little shack in the country. So please address me there:

Cucumber Hill Road  
Foster Center, Rhode Island

she was a grad. student.  
on part-time at Columbia  
Schäfer's course
