

Ref. NC-RB-BS

June 6, 1952

Dr. H.B. Andervont  
National Cancer Institute  
Bethesda 14. Md.

Dear Dr. Andervont:

Thank you for the generous shipment of your reprints on the milk agent. A few which would be duplicate are returned herewith.

Can you give me a citation for your review "The present status of the mammary tumor inciter problem"? I am finishing a review on Symbiosis and Cellular Genetics and would like to refer to a general article such as this.

Sincerely,

Joshua Lederberg
