

MEMO FROM
J. LEDERBERG
GENETICS DEPARTMENT
STANFORD UNIVERSITY
STANFORD, CALIFORNIA

TO: Wilson Stone

~~TX~~
~~RE~~
RO

To yours of 14th:

4/17/59

Can't think of very much different to do
though I suppose it may prove more expedient
to concentrate on some particular themes rather
than monograph all of genetics.

One topic that should be stressed is transplantation
— or do I reflect too medical a bias?

I confess I have a few doubts on whether such
a session at this time would be worth the
cost and trouble, but this may be mainly
weariness, and I certainly wouldn't want to
set up any hurdles.

What if we a 'vacation' ahead; coming home
and staying put a while will be much more so.

Yours

John

I just read of Knoll's report of aneuploidy
in monogamy in man. Remarkable!
