

MODEST PROPOSAL

MANIFESTO OF THE
NEW UNIVERSITY

Josh - Do you think our
reform will take university
back to what they used to be
Art Down

We move that the University cease the widespread duplicity of teaching
and research in areas which support military aggression.

To this end we demand:

1. That all National Defense Education Act Scholarships be rejected by students who now hold them. Defense is known to be military jargon for aggression.
2. That foreign languages, an essential tool for military and diplomatic oppression, cease to be taught on this campus.
3. That Medicine, Nursing and Pharmacy, three key components of military action, be barred from this campus.
4. That Engineering, a tool of the industrial military complex, be destroyed wherever it is taught.
5. That Speech, Theater and Journalism which [not only] spread the gospel of militarism [but are used each Christmas in the Bob Hope Oppression of the Vietnamese people, be denounced and eliminated.
6. That Sciences such as Philosophy, Social Studies, Economics, Psychology and Psychiatry, tools to capture man's mind and control his life style, no longer be tolerated by this liberated school.
7. That Ecology and Biology be recognized as the scientific basis for ecological and biological warfare and all faculty and students from these fields voluntarily resign.
8. That Foreign Area Studies, the basis of knowledge underlying imperialistic potential be withdrawn now, not next semester or next year.
9. That all Sciences which seek new knowledge be categorically eliminated until new facts can be proven free of problems before their discovery will be permitted.

Be it further resolved that Music, Dance and Elementary School Education be declared sanitized and allowable as courses at this Great University of Wisconsin.
