July 15, 1977

Dr. Martin Kaplan
PUGWASH Geneva
11A Ave. De la Paix
Switzerland

Dear Martin:

I am grateful to you for persevering about trying to get me to the PUGWASH meeting next month, but I am afraid it is just out of the question for this summer.

However, I ran into Joe Martin just a little while ago, and it reminded me to alert you to the fact that he had just retired from ambassadorial service and would be an excellent person to keep in mind for future PUGWASH meetings. In case you have misplaced it, his San Francisco address is:

Mr. Joseph Martin, Jr.
Pettit, Evers & Martin
The Transamerica Building
600 Montgomery Street
San Francisco, California 94111
415-434-4000

I was also glad to hear that Jim Leonard is now back in government, for the time being as Andy Young's deputy at the U.N. You may recall that he was the chief of the delegation to the Committee on Disarmament while they were negotiating the BW convention. He was for all intents and purposes pushed out by the Nixon crowd, and I was delighted to see that he has now been rehabilitated.

All the best to both of you.

Yours sincerely,

Joshua Lederberg
Professor of Genetics
