SUBJECT: Dr. Ledenberg:

Thanks for correcting those erroneous footnotes to history. It could become a burdensome job and I am discouraged from entering this field of "scholarship".

Attached are two semi-popular accounts that should be understandable by Simon (note p. 8 in the 1971 paper & the section in the Sci. Amer. one). Had he read the Sci. Amer. account he would surely have realized the biochemist's view of DNA in the mid-50's, even after W-C.
