Dr. Bruce King

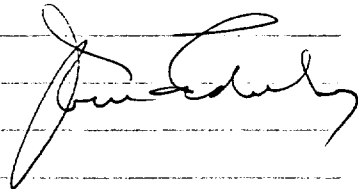

JUN 23 1987

Thank you for the patent on
formate decomposers.

You may wonder how our paths
crossed again (It was
DENORAL in 1980)

Catalytic decomposition of formate
was the probable explanation of the
results of the L.R. experiment in
the 1976 Viking Mars lander - so
you may be well aware. We
should have given more attention
to that possibility before the fact.
So you can see why the title
in EHEM=LINK intrigued me.

Sincerely

#243
