

Andre Lwoff

Pasteur Inst.

Dear Andre - Feb. 1 ~~19~~88

What a pleasure to see you again!

* Thank you for setting me straight about d'Herelle, and for reminding me about Mueller.

I had read all of his work on bacterial nutrition. But I did not recall that he was so clear about heterotrophisms \equiv loss of synthetic ability.

Enclosed is the final draft of my memoir on Et Tatum

I also enclose the reference to a simple "viroid", namely OH^-

Looking forward to seeing you in June,

Sincerely,

Joshua
