Dear Bill

Jan. 2, 1979

What a pleasant surprise to get your "Hemlock present" - and especially with the personal touch you gave it. I hope to use it in part to help pay for the journals and books that can assist in the conduct of my day to day responsibilities in my new office -- which have to do now not only with science, and science affairs, but also executive oversight in a vein that is a new challenge for me -- and for which I would certainly welcome your advice. If you have a spare hour soon, please let me visit you or vice versa: I do want to try out some of my visions of R.U.!

I am so glad that you have joined

our Council, and that you participate so  
vigorously already! I will certainly  
follow up your suggestions about  
Mr. Turner.

all the best, for 1979  
and always,

Jedh.

P. S. I am delighted to be able to write  
again -- if I warm up like a  
baseball pitcher (sic) my shoulder is  
not too stiff.
