President Joshua Lederberg
The Rockefeller University
York Avenue and 66 Street
New York, New York 10021

Dear President Lederberg:

I received my Ph.D. from Rockefeller in 1967 while Detlev Bronk was still its President. Both before and after my studies at Rockefeller, indeed throughout my scientific life, I have been committed to achieving a better conceptual understanding of the adaptive dynamics of brain and behavior.

A selection of my scientific articles has just been published in book form by Reidel Press in the series that recently published selected articles of Julian Schwinger and Norman Geschwind. I thought that you might be pleased to have such a volume by a Rockefeller graduate for your library, so I have taken the liberty of enclosing one. I have also sent a copy to Gerald Edelman in gratitude for his commitment to support theoretical advances in the neurosciences through the N.R.I.

Sincerely yours,

Stephen Grossberg
Professor of Mathematics,
Psychology, and Biomedical
Engineering
Director, Center for
Adaptive Systems
