SHERMAN FAIRCHILD SCIENCE BUILDING

Dec. 15th

Dear Josh,
Much as I would have liked to stop in N.Y. and visit you on my way back, I cannot do it this time.

I have spent five very interesting and fruitful weeks in Eric's lab. The results seem to be fairly encouraging and I am looking forward a longer stay in the future, if it will be possible to renew the Stanford-Penic

project.

Paolo sends the enclosed
with his best regards -
Of course, the belt is for
you since we hear that
you are very often around
the city at night and
we understand that N.Y.
is not too safe at night.

Very best wishes to you,
Marguerite and the rest
of the family

Olio
